RI TRANSPARENCY REPORT

2020

Altrafin Group

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

OO 10.1 Select the active ownership activities your organisation implemented in the reporting year.

Listed equity – engagement

- We engage with companies on ESG factors via our staff, collaborations or service providers.
- We do not engage directly and do not require external managers to engage with companies on ESG factors.

OO 10.2 Indicate why you do not engage and do not require external managers to engage.

Altrafin applies a strict top down driven investment philosophy and usually has no direct contact with the companies it invests in. The majority of our portfolio holdings are large caps based in Europe and the US. Therefore, any direct involvement and engagement with them won't have a significant impact.

Altrafin requires external managers that are used in the portfolios to report on ESG matters and discuss their ESG strategy before making an investment.

Listed equity – voting

- We cast our (proxy) votes directly or via dedicated voting providers
- We do not cast our (proxy) votes directly and do not require external managers to vote on our behalf

OO 10.3 Indicate why you do not cast your votes

- Indicate why you do not cast your votes

Altrafin has 60plus clients and most of them have several bank relationships. For Altrafin it is technically impossible to bundle the voting rights for a single stock from over 30 banks and hundreds of accounts. The logistics involved, including sign offs by the beneficial owners for each single stock in a way that Altrafin may cast a vote, are not manageable. Altrafin follows the developments in the voting providers closely and would welcome a solution that would allow to participate in an efficient manner.

Furthermore, Altrafin applies a strict top down driven investment philosophy and usually has no direct contact with the companies it invests in. The majority of our portfolio holdings are large caps based in Europe and the US. Therefore, any direct involvement and engagement with them won't have a significant impact.

We do not cast our votes but provide substantive research and voting recommendations to our clients.

Fixed income SSA – engagement

Altrafin pursues a long-term, flexible and themed 'top-down' investment approach with a focus on risk-adjusted returns. Great emphasis is placed on risk management during both, the building and day-to-day management of a portfolio. Actively managing asset allocation (cash, bonds, equities, currencies) is a key aspect of our financial portfolio management. Once the 'top-down' investment themes have been determined, the portfolios are populated with the following investment instruments: Individual securities (equities, bonds), ETFs (passive exchange-traded funds), specialised targeted funds (for niche markets/themes/sectors). ESG factors are integrated in the investment process firstly via an exclusion process, secondly via an internal ESG Score (per asset classes) and a consolidated ESG portfolio reporting (on a clients' demand Altrafin performs individual ESG portfolio ratings).

LEI 01.2

Describe your organisation's approach to ESG incorporation and the reasons for choosing the particular strategy/strategies.

The ESG strategy is based on a negative/exclusionary screening list. It is also based on a ratings regime relying on third party data and a self-developed analysis tool of that data incorporating environmental, social and governance factors.

The leading analyst is responsible to comply with the ESG regime and only suggest securities that match the ESG criteria set out. The PM will have the final call and is ultimately responsible for the security selection, also regarding ESG. The risk management function checks constantly that only securities that match the criteria are part of the portfolios.

The ESG strategy and criteria are the same for each security and do not differ by country, region, sector, etc.

SSA

In this areas Altrafin mainly considers G as a factors. Due to the lack of data in teh other areas and the fact that Altrafin only invests in Western Europe, North America, Japan, Australia nd New Zealand in this partiular area.

Corporate (financial)

All factors are considered in devoloping an ESG Score for each single company. The score considers E, S and G while each of the three consists of various sub-factors.

Sub-factors:

E: resource use, emissions, innovation

G: management, shareholders, CSR strategy

S: workforce, human rights, community, product responsibility

To fill these sub-factors 400+ measures are taken into account.

Plus, the factors are benchmarked against the sector data of the factor.

Corporate (non-financial)

All factors are considered in devoloping an ESG Score for each single company. The score considers E, S and G while each of the three consists of various sub-factors.

Sub-factors:

E: resource use, emissions, innovation

G: management, shareholders, CSR strategy

S: workforce, human rights, community, product responsibility
To fill these sub-factors 400+ measures are taken into account.
Plus, the factors are benchmarked against the sector data of the factor.
