RI TRANSPARENCY REPORT

2020

Dansk Vaekstkapital

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

SG 01.4

Describe your organisation’s investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

At Dansk Vækstkapital we want to create growth and return in an ethically and socially responsible manner. Our investment principles stipulate that ethical and environmental aspects must be considered when making our investment decisions. Our investment policies and strategies reflect this. Therefore, we include environmental, social and governance considerations in our decision-making and in our daily procedures. We require the funds we invest in to act responsibly, and we follow a number of established principles for responsible investment ourselves.

Our points of reference for the CSR policy are the UN Principles for Responsible Investments (UNPRI) and the principles outlined in the UN Global Compact initiative. Furthermore, we follow the codes and guidelines established by Invest Europe (the European Private Equity and Venture Capital Association, EVCA) and the Danish Venture Capital and Private Equity Association (DVCA).

SG 01.5

Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

Our approach to ESG is based on internationally agreed principles for sustainable development, primarily UN Global Compact and PRI.

As a responsible investor, our approach to ESG-factors is focused on dialogue, information, and cooperation. As a part of our due diligence processes, we strive to identify possible ESG-issues and we instruct potential investee funds to give us their own account of their ESG profile.

We include ESG-questions in our due diligence process and we require, that the funds we invest in commit to handling ESG-issues based on the ten UN principles. Even for well-prepared funds, things can go wrong. If a negative impact-issue occurs, we go into constructive dialogue with the fund to stop and avoid further negative impact.

SG 06.1

List the main responsible investment objectives that your organisation set for the reporting year.

Responsible investment processes

- Provide training on ESG incorporation

Key performance indicator

By carrying out spot checks on a regular basis, we continuously monitor that our ESG-DD framework is properly implemented in all investments.

Progress achieved

By looking into specific investment and loan cases, we see what considerations we had when the financing took place.

In this way, we monitor the due diligence process and get a clearer picture of where to make improvements and how to take the necessary steps to address any issues if needed.

- Provide training on ESG engagement
- Improved communication of ESG activities within the organisation

Key performance indicator

All investment managers receive training on a regular basis.

Progress achieved

All investment managers have been introduced to the ESG-due diligence framework. The overall level of awareness in regards to ESG has been strengthened and the investment teams regularly discuss ESG-issues, but we are still planning to make further training and improvements, especially concerned about environmental and climate-related risks and opportunities.

- Improved engagement to encourage change with regards to management of ESG issues
- Improved ESG incorporation into investment decision making processes

Key performance indicator

All investment managers are aware of making ESG-due diligence with the funds.

Progress achieved

ESG-risks are considered and addressed in investments.
