RI TRANSPARENCY REPORT

2020

Peninsula Participações

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

SG 01.4

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

Península is a private investment firm, focused on long-term value creation with an owner-approach to investing. Founded in 2006 by Abilio Diniz, Península currently manages proprietary assets from the Diniz family across private and liquid investment vehicles. Main investment activities include direct private investments, a proprietary global hedge fund and a real estate portfolio. Our differentiations are: long-term proprietary capital, which allows flexibility and independence in resource allocation for optimized return, broad local and sectoral knowledge that ensures access to opportunities, and a team of multidisciplinary and experienced managers. As a national institutional investor, the company invests with integrity and responsibility, believing that, through its investments, it can support the development of new entrepreneurs and wealth generation.

For direct investments, the mandate is to invest in companies, with a high growth thesis in consumer-related sectors, developing new entrepreneurship and innovative models. Peninsula has an active approach as an investor, participating through governance structures in the strategic decisions of invested companies. ESG factors are included in both pre-investment analysis as well as post-investment follow-up, as metrics to assess risk and identify opportunities and competitive advantages of the target company.

SG 01.5

Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

Since joining UN PRI in 2016, Peninsula has continuously been developing its ESG-approach in the investment policy

As of late 2018, we have established an internal multidisciplinary RI committee, including executives across all asset classes within the company (direct investments, hedge fund/liquid investments, real state, backoffice, foundation), and along with senior partners and our investment board. The objective is to: formalize and institutionalize our responsible investment policy, covering majority of AUM. The Responsible Investment committee has include clear objectives and initiatives to be implemented by each area of the company and on each asset class. In addition, the committee is responsible for tracking progress, ensuring that the established goals are being achieved and complied. Finally, we aim to enhance our RI DNA, ensuring that Peninsula's culture embrace RI as part of a fundamental strategic pillar, with direct and indirect effects in the Brazilian investment community.

SG 03.1 Indicate if your organisation has a policy on managing potential conflicts of interest in the investment process.

Yes

SG 03.2 Describe your policy on managing potential conflicts of interest in the investment process.

The conflicts of interests situations are those arising out of the performance of the duties of a certain Staff Member, wherein the personal interests of such Staff Member may be divergent from or conflicting with those of Península and/or of two or more of its clients, to each of which Península has a duty (the "Conflict of Interests Situation").

The Staff Member has a duty to act in good faith and in accordance with the investor's interests, with a view not to harming the fiduciary relation with the client. In this connection, the Staff Member should be aware of a possible conflict of interest situation, and whenever such a situation shall occur, he/she should immediately notify the Chief Compliance Officer thereon, and refrain from consummating the act or omission giving rise to the conflict of interest situation until a decision to the contrary is made.

The Chief Compliance Officer will evaluate the need to submit the information received to the Compliance Committee. Notwithstanding the foregoing, all Staff Members are assured a right to submit potential conflict situations to members of the Compliance Committee whenever they understand that such Committee should examine a certain issue.

All Private Equity investment analysts are responsible for conducting ESG risk and opportunities analysis throughout the diligence of new investment opportunities. Along with the traditional analysis (such as DCF modeling, IRR projections, industry and company knowledge), ESG factors must be identified, understood in-depth and quantified in terms of NPV. Also, we utilize IRIS and ODS metrics to assess the impact of the core business, favoring thesis that are aligned with our purpose (eg: the social impact of education, which is also accompanied by favourable financial prospects). All those factors must be taken into consideration on investment decisions, and are analyzed and understood by our investment board, which has the final say on capital allocation.

In addition to new investment opportunities, analysts monitor ESG KPI's and conduct an annual report for each of our direct investments, including Private Equity investments, to be discussed and analyzed by our investment board. Following the monitoring of KPI's, key directors are responsible for the improvement of such metrics, which is conducted through interaction with the management of the companies we invest in. In addition to that, Peninsula provides knowledge and support the companies we invest on the implementation of those RI initiatives, along with tracking and sponsorship from the top.

For all listed equity investments, we assess ESG factors into decision making through publicly available data collected from Bloomberg terminal (eg Bloomberg Environmental Disclosure Score, GHG emission, available policies, among others) and other providers, including ISS (eg ISS governance QuickScore, ISS Board Score, ISS Audit Score, among others) and Sustainalytics (eg Sustainalytics Environment, Social and Governance Percentiles).
