

CLIMATE TRANSPARENCY REPORT 2020

Federal Finance

About the Climate-related Disclosure Indicators

Climate has been identified as a top priority for PRI signatories, with over 70% of asset owners reporting this as the most important long-term trend they are acting on.

The FSB Task Force's guidance on climate-related financial disclosure aim to create a single framework for disclosure on assessment and management of climate-related risk. The recommendations, supported by investors representing US\$22 trillion, identify four main disclosures, Governance, Strategy, Risk Management, Metrics and Targets, and include specific guidance for asset owners and managers.

As a result, the PRI introduced climate-related disclosure indicators that can be used to align with the TCFD recommendations in the 2020 PRI Reporting Framework.

About this report

This report is an export of only the climate-related indicators from the 2020 Reporting Framework response. The full Public Transparency Report is available here (<https://reporting.unpri.org/surveys/PRI-reporting-framework-2020/-84A66251-5EAF-4BFD-B34C-B3ED5513DB93/79894dbc337a40828d895f9402aa63de/html/2/?lang=en&a=1>). It shows the responses to all the completed climate indicators, even those you chose to keep private. It is designed for your internal review or – if you wish - to share with your stakeholders.

The PRI will not publish this report on its website if you have designated your 2020 climate reporting as “private”. Otherwise, you will be able to access the Climate Transparency Report of your organisation and that of other signatories on the [PRI website](#) and on the [Data Portal](#).

To easily locate information, there is a **Recommendation index** which summarises the indicators that signatories complete and disclose. The report presents information exactly as it was reported as per signatory preference. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory are presented in this report.

SG 01.7 CC Indicate whether the organisation has assessed the likelihood and impact of these climate risks?

Yes

No

Describe why your organisation has not yet assessed the likelihood and impact of climate risks

Our climate strategy will be publish in 2020. We are also developing a tool in order to monitor the climate risks. We are also finalising a RFP to obtain different climate related data including impact risks for issuers.

SG 01.8 CC Indicate whether the organisation publicly supports the TCFD?

Yes

No

Explain the rationale

We aim to develop a climate strategy aligned with TCFD recommendations but didn't support it publicly.

**SG 01.9
CC**

Indicate whether there is an organisation-wide strategy in place to identify and manage material climate-related risks and opportunities.

Yes

Describe

We are developing a climate strategy aligned with the TCFD. In this perspective, we will set in 2020 a Climate committee in order to identify and manage climate related risks. Following the training sessions organized in 2019, we have set up a dedicated team including ESG analysts and risk managers to identify the relevant indicators to manage climate-related risks and opportunities

SG 13.1

Indicate whether the organisation carries out scenario analysis and/or modelling, and if it does, provide a description of the scenario analysis (by asset class, sector, strategic asset allocation, etc.).

- Yes, in order to assess future ESG factors

Describe

Each of our ESG analyst has sectorial responsibilities. For each sector the analysts have to measure the impact of the different ESG criteria. The weights of these criteria are then calculated to highlight in our rating the most important ESG issues for each sector.

- Yes, in order to assess future climate-related risks and opportunities
- No, our organisation does not currently carry out scenario analysis and/or modelling

SG 13.2

Indicate if your organisation considers ESG issues in strategic asset allocation and/or allocation of assets between sectors or geographic markets.

We do the following

- Allocation between asset classes
- Determining fixed income duration
- Allocation of assets between geographic markets
- Sector weightings
- Other, specify

We are developing a funds range dedicated to some specific issues. For the rest of our investments, we have develop a best in class approach

- We do not consider ESG issues in strategic asset allocation

SG 13.3

**SG 14.8
CC**

Indicate whether climate-related risks are integrated into overall risk management and explain the risk management processes used for identifying, assessing and managing climate-related risks.

- Processes for climate-related risks are integrated into overall risk management

Please describe

Climate related issues are integrated into our issuers reviews presented on a weekly basis during our risk committee. The committee pay a specific attention to these risks. In 2020 we will upgrade our process by isolating the climate risks assessments thanks to the new data that will be available, including transition risks and physical risks.

- Processes for climate-related risks are not integrated into overall risk management
