RI TRANSPARENCY REPORT

2020

Energy Power Partners

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

As a long-term investor, EPP understands that strong financial results are intrinsically linked with responsible investment and operating practices. EPP was established in 2009 as a renewable energy-focused fund to help address the global risks of climate change, and to pursue a growing pipeline of attractive investment opportunities as the world transitions to low carbon energy. As a renewable energy investor, responsible environmental investing is fundamental to EPP's strategy. The firm is committed to investing in a socially responsible manner as well. EPP values its employees and, as an energy project owner and operator, recognizes the importance of maintaining a safe and team-oriented work environment, providing regular safety training, and promoting a progressive, open and equal opportunity workplace. EPP also endeavors to cultivate strong business and community relationships by establishing respectful and mutually-beneficial partnerships with contractual counterparties at its projects, and by maintaining vigilant compliance with local regulations, particularly those concerning air emissions at EPP's biogas facilities. EPP believes that operating in good faith towards its projects' employees, counterparties, and communities is the only way to position EPP's funds for sustainable and attractive returns for their limited partners.

Describe your policy on managing potential conflicts of interest in the investment process.

EPP has adopted a Code of Ethics pursuant to Rule 204A-1 under the Investment Advisers Act of 1940, as amended. The Code governs the activities of EPP's employees, who are held to high standards of integrity and fiduciary responsibility. The Code mandates that EPP's employees avoid conflicts of interest, or the appearance of conflicts of interest, in connection with the firm's investment process. Among other measures, the Code's policies for managing potential conflicts of interest in the investment process include controls related to the following key issues:

- Avoidance of self-dealing by ensuring that EPP's principals do not have personal or financial interests in securities recommended for investment
- Internal approval processes for certain personal investments and trading accounts, and disclosure requirements around all such activities
- Restrictions on activities with other companies, boards, and other organizations
- Ensuring that service providers offer the most effective services and the best economic terms possible, particularly if such service providers are EPP affiliates
