

# CLIMATE TRANSPARENCY REPORT 2020

C-QUADRAT Asset Management GmbH

# About the Climate-related Disclosure Indicators

Climate has been identified as a top priority for PRI signatories, with over 70% of asset owners reporting this as the most important long-term trend they are acting on.

The FSB Task Force's guidance on climate-related financial disclosure aim to create a single framework for disclosure on assessment and management of climate-related risk. The recommendations, supported by investors representing US\$22 trillion, identify four main disclosures, Governance, Strategy, Risk Management, Metrics and Targets, and include specific guidance for asset owners and managers.

As a result, the PRI introduced climate-related disclosure indicators that can be used to align with the TCFD recommendations in the 2020 PRI Reporting Framework.

## About this report

This report is an export of only the climate-related indicators from the 2020 Reporting Framework response. The full Public Transparency Report is available here (<https://reporting.unpri.org/surveys/PRI-reporting-framework-2020/-AABFAEF6-9057-412D-B886-349C014D01A9/79894dbc337a40828d895f9402aa63de/html/2/?lang=en&a=1>). It shows the responses to all the completed climate indicators, even those you chose to keep private. It is designed for your internal review or – if you wish - to share with your stakeholders.

The PRI will not publish this report on its website if you have designated your 2020 climate reporting as “private”. Otherwise, you will be able to access the Climate Transparency Report of your organisation and that of other signatories on the [PRI website](#) and on the [Data Portal](#).

To easily locate information, there is a **Recommendation index** which summarises the indicators that signatories complete and disclose. The report presents information exactly as it was reported as per signatory preference. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory are presented in this report.

## Brief description and measures of investment

C-QUADRAT launched its first Microfinance fund in 2006, the "Dual Return Vision Microfinance Fund". In 2010 the "Dual Return Vision Microfinance Local Currency Fund" was launched, which is unique in the investment philosophy of giving loans to microfinance institutions in the regional local currency. This helps MFIs to reduce transaction costs (e.g. a MFI does not have to hedge a foreign currency exposure like the US-Dollar in the portfolio anymore) and this saving can be passed on to microentrepreneurs in the form of lower interest rates. To date over 1,5billion USD have been handed out in the form of more than 1500 promissory notes to around 400 different MFIs in almost 60 countries. This meaningful and sustainable help for self-help permits families access to food, medical care and education for their children. Until today the lives of more than one million people have been transformed with the help of the Vision Microfinance Funds.
