RI TRANSPARENCY REPORT

2020

Circuitus Capital LLP

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Our investment strategy is to create long-term value for all our stakeholders, including the Limited Partners/ Investors, local community users and the environment/ society as a whole. Investments are intended to be sustainable.

ESG themes are embedded into our investment process to ensure any risks are managed throughout the construction phase (where relevant) and subsequent concessionary period. Circuitus Capital ensures the same focus on ESG matters and sustainable investment are maintained by construction partners and other related companies, including a requirement to follow the highest standards of corporate governance.

SG 01.5

Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

Circuitus Capital's ESG Policy requires that ESG risks are assessed at each stage of the investment process. This includes an analysis of all ESG matters, with an increasing level of detail and understanding as the development of the project progresses.

Whether at the pre-investment stage or during the period of the investment, any ESG issues considered to need improvement will be jointly tackled by Circuitus Capital and the company's management. A corrective action plan will be formulated and action steps monitored in progress reports to completion.

Ultimately, Circuitus Capital will not proceed with an investment if it believes any ESG matters identified can not be resolved using the approach above.

INF 05	Mandatory	Public	Gateway	PRI 1
--------	-----------	--------	---------	-------

INF 05.1 Indicate if your organisation typically incorporates ESG issues when selecting infrastructure investments.

Yes

INF 05.2 Describe your organisation's approach to incorporating ESG issues in infrastructure investment selection.

All investment opportunities are reviewed for ESG requirements and the absence of any controversial ESG features. They are also screened to ensure full engagement with local stakeholders and authorities to ensure the sustainability of the investment. As negotiations progress, the initial review of ESG matters is further reviewed and any areas requiring more detailed assessment are followed-up on, with the investment only progressing if the results are satisfactory.

The ESG analysis is continually reviewed and updated throughout the period of the investment, with all findings monitored to ensure there are no issues arising. Both the Italian and Spanish Construction Partners produce annual ESG reports highlighting the certificates, approaches and any awards received during the year.
