RI TRANSPARENCY REPORT

2017

Munich Venture Partners

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2017 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

Munich Venture Partners: ESG Guidelines Introduction and Mission Statement MVP is the cleantech venture capital specialist based in Munich. As an independent venture capital organization we have set ourselves a strong goal: To assist today's innovators to become tomorrow's market leaders. Munich Venture Partners concentrates on venture capital for high-tech start-up companies with growth-oriented and profit-generating projects and potential impact on the future of resource efficiency, energy generation and distribution. We aspire to invest in a sustainable and responsible manner by actively managing Environmental, Social and Governance Risks. Hence, the active management of ESG related issues is integrated into our investment strategy. Additionally, we want to promote the integration of ESG management systems externally and on an industry level. The MVP team - senior executives from large international corporations, experienced venture capital professionals and entrepreneurs - has made it its business to identify and develop the potential of startups and growth stage companies. Since our profound industry and investment expertise enable us to appraise technology and market potential, we are also in a position to plan and implement an appropriate growth strategy with our portfolio companies. Here, MVP accompanies founders in a professional manner with sound business and technical expertise through all stages of development - from the initial idea through to a profitable company which is sustainable in the long term.

Munich Venture Partners was founded in 2005 and is headquartered in Munich. It is in part funded by the European Union and its Competitiveness and Innovation Framework Programme (CIP). We are convinced, that the active management of ESG related issues will have an impact on the financial performance of our portfolio and help growing profitable businesses bringing benefits to our society. Therefore our investment process is guided by a consistent set of principles that not only implement ESG matters in our everyday actions, but also align the interests of a profit driven business with those of our society: 1) MVP incorporates ESG issues into the investment and decision making process 2) MVP proactively drives forward the incorporation of ESG issues in management practices of the portfolio companies 3) MVP will continuously improve transparency and monitoring of ESG issues in the portfolio companies 4) MVP is dedicated to continuously improve the implementation of meaningful ESG principles within the portfolio companies. Therefore MVP will report and monitor the progress of ESG implementation and its effect on portfolio company performance. This will help improving this responsible investing strategy. 5) MVP collaborates to more effectively implement ESG principles within the Venture Capital and Private Equity industry. We have developed a guideline for our investment process and the management of our investments regarding ESG related issues: 1) Company and Business a. The company should not engage in the production or trade of any products illegal by law, international regulations or international conventions and agreements b. The company should not be involved in one of the following industries: i. Alcohol and tobacco ii. Gambling iii. Weapons iv. Pornography v. Genetically Modified Organisms (GMO) or human cloning c. The company should not engage in business that is materially and immitigable harmful to the environment and/or human life through the application of its product or its supply chain 2) Human Rights a. The company must comply with and support the protection of internationally proclaimed human rights b. The company must ensure that it is not complicit in human right abuse 3) Labor a. The company must ensure it does not profit from or directly or indirectly supports the proliferation of forced and compulsory labor b. The company must ensure it does not profit from or directly or indirectly supports the proliferation of child labor c. The company must avoid any discrimination in respect of employment and occupation 4) Environment a. The company must have a precautionary approach regarding environmental challenges b. The company should engage in the development and proliferation of environmentally friendly technologies and products c. The company must not use or engage in the production of fuels or energy that potentially have negative impact on either food supply, biodiversity, and carbon footprint d. The company must handle all chemicals and materials utilized in R&D and production processes in a responsible and safe manner to avoid harmful effects on the environment or human health 5) Anti-Corruption a. The company must actively work against all forms of corruption. Investing in clean technology and companies generating a benefit for the environment lies at the core of our investment focus. The principals are the underlying guidelines for all our investment activities and are reflected in the decision making of our investment process. Hence, each process step requires the documentation and monitoring of relevant ESG issues. The ESG risk management procedure has been integrated into the relevant investment documents as much as possible. This allows a standardized approach towards the application of the ESG Risk Management procedure.

Core Assessed

General

SG 03.1

Indicate if your organisation has a policy on managing potential conflicts of interest in the investment process.

Yes

SG 03.2

Describe your policy on managing potential conflicts of interest in the investment process.

MVP's fund documents cover the issue of potential conflicts of interest in the investment process:

"The Investor Advisory Board shall provide such advice as is requested by the Managing Limited Partner in connection with general policies, investments of the MVP Fund II and conflicts of interest..."

"Consequently, VCs or other value-driven co-investors are preferred over pure financial partners. Strategic investors will be invited to co-invest in financing rounds only if potential conflict of interest between the co-investor and the company can be excluded and if the co-investor is clearly focusing on monetary returns as opposed to leveraging its own business through gaining hold of interesting technologies or solutions in early stages of their development."

Overview

PE 04	Mandatory	Public	Core Assessed	PRI 2
-------	-----------	--------	---------------	-------

PE 04.1 Indicate if your organisation's investment guidelines for private equity refer to responsible investment.

- Our investment guidelines do refer to responsible investment
- Our investment guidelines do not refer to responsible investment
- We do not have investment guidelines

Fundraising of private equity funds

PE 05	Mandatory	Public	Core Assessed	PRI 1,4,6
-------	-----------	--------	---------------	-----------

PE 05.1 Indicate if your most recent fund placement documents (private placement memorandums (PPMs) or similar) refer to responsible investment aspects of your organisation.

- Yes

PE 05.2 Indicate how your fund placement documents (PPMs or similar) refer to the following responsible investment aspects of your organisation:

- Policy and commitment to responsible investment
- Approach to ESG issues in pre-investment processes
- Approach to ESG issues in post-investment processes
- No
- Not applicable as our organisation does not fundraise

Pre-investment (selection)

PE 07	Mandatory	Public	Gateway	PRI 1
-------	-----------	--------	---------	-------

PE 07.1 During due-diligence indicate if your organisation typically incorporates ESG issues when selecting private equity investments.

- Yes

PE 07.2

Describe your organisation's approach to incorporating ESG issues in private equity investment selection.

The MVP Funds Due Diligence Guidelines represent a superset of principles. They reflect a set of factors driving the decision making process for an investment of MVP into any high-tech startup company. Similar to traditional financial and technological risks, an investment also always bears risks related to environmental, social and governance issues. These ESG related risks need to be managed adequately to avoid threats against the company and shareholder value. Hence, to us as responsible investors, identification of ESG related risks is of the same importance as traditional risks. During the DD process an ESG risk profile related to an investment is generated, where Environmental, Social and Governance risks are valued and weighed independently in the following categories:

High: Business activities are very likely to have significant harmful and irreversible environmental (E), social (S) or governmental (G) impact. Medium: Business activities may result in specific harmful environmental (E), social (S) or governmental (G) impact. However, the impact is small and mainly reversible. Low: Business activities very unlikely result in harmful environmental (E), social (S) or governmental (G) impact. The findings of a thorough ESG related Due Diligence will be reported in the investment proposal and suggesting a risk mitigation strategy.
