

CLIMATE TRANSPARENCY REPORT 2020

Aktie-Ansvar AB

About the Climate-related Disclosure Indicators

Climate has been identified as a top priority for PRI signatories, with over 70% of asset owners reporting this as the most important long-term trend they are acting on.

The FSB Task Force's guidance on climate-related financial disclosure aim to create a single framework for disclosure on assessment and management of climate-related risk. The recommendations, supported by investors representing US\$22 trillion, identify four main disclosures, Governance, Strategy, Risk Management, Metrics and Targets, and include specific guidance for asset owners and managers.

As a result, the PRI introduced climate-related disclosure indicators that can be used to align with the TCFD recommendations in the 2020 PRI Reporting Framework.

About this report

This report is an export of only the climate-related indicators from the 2020 Reporting Framework response. The full Public Transparency Report is available here (<https://reporting.unpri.org/surveys/PRI-reporting-framework-2020/-E59DDE2F-6F6C-4126-9745-7278C072F266/79894dbc337a40828d895f9402aa63de/html/2/?lang=en&a=1>). It shows the responses to all the completed climate indicators, even those you chose to keep private. It is designed for your internal review or – if you wish - to share with your stakeholders.

The PRI will not publish this report on its website if you have designated your 2020 climate reporting as “private”. Otherwise, you will be able to access the Climate Transparency Report of your organisation and that of other signatories on the [PRI website](#) and on the [Data Portal](#).

To easily locate information, there is a **Recommendation index** which summarises the indicators that signatories complete and disclose. The report presents information exactly as it was reported as per signatory preference. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory are presented in this report.

Aktie-Ansvar AB do not apply a general overall strategy for all investment decisions when it comes to climate-related risks and opportunities. In our Swedish and European equity funds there is no investments in companies within the oil, gas and coal industry. Some investments that are being done is due to good opportunities for the future based on climate-related risks. However, this is very individual depending on each case.

To exemplify, our Swedish equity fund invests in a company called Scandi Standard, which is a producer of chicken-based food products. In this particular case we see an opportunity as it is both more climate-friendly and healthier than bovine animals.
