RI TRANSPARENCY REPORT

2019

Luxcara

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2019 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Luxcara is an independent asset manager who provides institutional investors with access to equity and debt opportunities in the international renewable energy market. The owner-managed company acquires, structures, finances and operates investments in renewable energy and its related infrastructure with a long-term perspective. A particular focus lies on free-market power purchase agreements.

Luxcara exclusively invests in renewable energy, and thereby into an ecologically and economically sustainable asset class. In addition, social and good governance factors are an integral part of the assessment of investments. For example, all business partners need to commit to Luxcara's Code of Conduct, thereby accepting ecological, social and governance standards in the context of human rights, anti-corruption etc.

Luxcara follows a sustainability themed investment strategy by specializing exclusively on renewable energy investments. The company's responsible investment policy includes not only ecological factors, but also social and corporate governance aspects. Luxcara screens ESG factors during the investment and decision processes as well as part of the regular monitoring.

Environmental: Luxcara's core business is renewable energy and thereby contributes to environmental sustainability per se. In addition, all assets undergo a detailed due diligence process including ESG issues. With respect to environmental issues, all of Luxcara's investments need to make a positive contribution to climate change and to reaching the Sustainable Development Goals (SDG). It is not possible for Luxcara to invest in assets, which do not make a contribution against climate change. Furthermore, already at the pre-investment stage it is checked whether the deconstruction / recycling plan meets Luxcara's waste management expectations, and if the investment does compensate its environmental impact.

Social: Luxcara only realizes investments that comply with human rights and working rights standards. Luxcara does include in its ESG DD prior to the investment decision the possibility of conflicts with the local community before and after commissioning, e.g. due to construction works and noise or light pollution. Luxcara actively engages in strengthening community relations.

Governance: Every investment needs to comply with anti-corruption standards and needs to be independent and stable. The supply chain needs to be fully transparent regarding all involved parties. Every business partner is asked to sign Luxcara's business partner code of conduct, which is based on the UN Global Compact, the UN Principles for Responsible Investment, the German Corporate Governance Codex and the CFA Asset Manager Code.
