# RI TRANSPARENCY REPORT

## 2020

### Xeraya Capital

## About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

## Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

**SG 01.4**

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

Xeraya recognises its provenance out of Khazanah Nasional Berhad, which is itself a PRI signatory, and also of the responsibility faced when managing investment capital, be it from public or private funds, that investing responsibly with an overt social and an ethical dimension is incumbent.

Xeraya is envisioned to provide agile, capital support via venture capital and private equity to catalyse life sciences breakthroughs and bring life changing innovations to human wellbeing. In investment mode, Xeraya has a three-pronged, yet simple vision; react quickly to opportunities, take a long-term view on investments, and ensure partner companies make a difference to the lives of Malaysians and people around the world.

**SG 01.5**

Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

At Xeraya, we structurally integrate ESG factors into our investment decision making process. Xeraya recognises the importance of incorporating ESG considerations into all stages of the investment process and is committed to consider material ESG issues in the course of its due diligence prior to making its investment and to include ESG considerations as standard practice in investment meeting and committee discussions.

The sustainability performance of companies can impact their ability to create long term value for investors, and therefore we consider ESG integration an important instrument to improve the risk-return profile of the investments we make. The focus is on ESG factors that are material from a financial or risk point of view. The investments team and others involved in the process of assessing a potential investment opportunity and involved in the deliberations to approve an investment decision will determine and exercise the collective institutional discretion as to the level of ESG integration at each portfolio company.

## Overview

PE 02	Mandatory	Public	Core Assessed	PRI 2
-------	-----------	--------	---------------	-------

**PE 02.1** Indicate whether your organisation's investment activities are guided by a responsible investment policy / follow responsible investment guidelines.

- Our investment activities are guided by a responsible investment policy

**PE 02.2** Describe how your organisation outlines expectations on staff and portfolio companies' approach towards ESG issues in investment activities.

Xeraya acknowledges the importance of investor stewardship. It is in the best interest of our partners that we monitor the companies in which we invest, that we vote on the shares that we hold, and that we engage with companies on issues like strategy, risk and corporate governance.

When an investment is identified as falling short of Xeraya's deemed Responsible Investment standards within the ambit of the ESG considerations, our view is that the investment itself may develop either an increased risk exposure or will fall short from Xeraya's purpose, objective and goals. Xeraya shall then seek to enter into dialogue with the investee company's management. During this engagement process, we share our concerns or the ESG risks that we identified for the company and make suggestions for improvement. By sharing ESG objectives, policies and practices with the portfolio company and seeking their formal commitment by incorporating ESG issues into the deal documents to support the development of a corrective action plan, after which, we closely follow the progress made by the company.

- Our investment activities are not guided by a responsible investment policy
- We do not have a responsible investment policy

- No
- Not applicable as our organisation does not fundraise

## Pre-investment (selection)

PE 05	Mandatory	Public	Gateway	PRI 1
-------	-----------	--------	---------	-------

PE 05.1	During due-diligence indicate if your organisation typically incorporates ESG issues when selecting private equity investments.
---------	---

Yes

PE 05.2	Describe your organisation's approach to incorporating ESG issues in private equity investment selection.
---------	---

Xeraya has integrated the consideration and thoughtful management of ESG issues structurally into our investment decision making process, across all stages. The focus is on ESG factors that are material from a financial or risk point of view.

At the Screening Stage, as best possible, the Investments team will appropriately identify the potential investment's ESG risks and value creation opportunities. The deal team will seek to identify how or whether the investment opportunity fits Xeraya's investment mandate and ensure that the investment opportunity is not on Xeraya's Prohibitive Investment list.

At the next stage of investment, the depth of the Due Diligence procedures should be based upon the categorization of the investment opportunity. High Risk and Moderate Risk investment opportunities should undergo more in-depth risk and impact assessment. Depending on the circumstances, technical consultants may be engaged for additional expertise. The capacity, commitment and track record of the management team will be assessed. Any circumstances that would result in a decision not to move forward into the investment decision stage will be identified, described and recorded.

At the Investment Stage, in consultation with the dedicated PRI team, based on the ESG risks and opportunities identified, specific short-term and long-term recommendations will be made to close ESG performance gaps and enhance ESG practices. A portion of the investment paper/memo (depending on level of risk identified) is dedicated to the ESG assessment. The deal team will engage with the management and develop an appropriate actionable plan. Once a suitably acceptable plan has been developed, the findings and proposed action plan should be presented to the Peer Review Committee, Investment Committee and Board.

- Reporting standards, industry codes and certifications
- International initiatives, declarations or standards
- Engagements with stakeholders (e.g. customers and suppliers)
- Advice from external resources
- Other, specify
- We do not track this information

PE 06.2

Describe how this information is reported to, considered and documented by the Investment Committee or similar.

Where there are material issues identified during the diligence process, either include the management of these issues in a 100-day plan post-close, or otherwise monitor ongoing progress on ESG issues, as applicable. Where management of, or performance on, a material issue is considered by Xeraya to need improvement, the investments team will work with company management to support the development of a corrective action plan. Once a suitably acceptable plan has been developed, the findings and proposed action plan will be presented to the Peer Review Committee, Investment Committee and Board.

The ESG assessment will be included as part of the proposed investment with suggestions for ESG terms included in the definitive agreement(s). As appropriate, depending on the nature of the investment, time-bound ESG action plans to close ESG performance gaps, setting ESG targets and requirements to report on performance may be included in the definitive agreement(s). Alternatively, the deal team and company management may incorporate such action plans, targets and reporting requirements into management's ongoing key performance indicators ("KPI").
