

# CLIMATE TRANSPARENCY REPORT 2020

Tundra Fonder AB

# About the Climate-related Disclosure Indicators

Climate has been identified as a top priority for PRI signatories, with over 70% of asset owners reporting this as the most important long-term trend they are acting on.

The FSB Task Force's guidance on climate-related financial disclosure aim to create a single framework for disclosure on assessment and management of climate-related risk. The recommendations, supported by investors representing US\$22 trillion, identify four main disclosures, Governance, Strategy, Risk Management, Metrics and Targets, and include specific guidance for asset owners and managers.

As a result, the PRI introduced climate-related disclosure indicators that can be used to align with the TCFD recommendations in the 2020 PRI Reporting Framework.

## About this report

This report is an export of only the climate-related indicators from the 2020 Reporting Framework response. The full Public Transparency Report is available here (<https://reporting.unpri.org/surveys/PRI-reporting-framework-2020/-C1FF4298-2BE5-4FE7-BCA7-BD1A51474825/79894dbc337a40828d895f9402aa63de/html/2/?!lang=en&a=1>). It shows the responses to all the completed climate indicators, even those you chose to keep private. It is designed for your internal review or – if you wish - to share with your stakeholders.

The PRI will not publish this report on its website if you have designated your 2020 climate reporting as “private”. Otherwise, you will be able to access the Climate Transparency Report of your organisation and that of other signatories on the [PRI website](#) and on the [Data Portal](#).

To easily locate information, there is a **Recommendation index** which summarises the indicators that signatories complete and disclose. The report presents information exactly as it was reported as per signatory preference. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory are presented in this report.

Please describe

All portfolio companies are encouraged to report on emissions. Through our ESG Questionnaire and feedback letter that is sent to all companies in all of our 4 funds we recommend the TCFD framework for reporting.

As an example of commitment; Tundra Fonder recently hosted a webinar on the Task Force on Climate-related Financial Disclosures reporting framework (TCFD). Reporting on climate risks has become critical issues for companies and for financial institutions investing in them as well as for other corporate stakeholders. Representatives from our major holdings joined the event, as well as participants from selected Stock Exchanges and representatives from local UNDP units. Invited guest speakers were the experts Jane Stevensen of JS Global Advisory Ltd and Paul Stuart-Smith of Zero Carbon Finance Ltd, who guided us through the reporting framework on how to provide decision-useful information to lenders, insurers, and investors.

- No, we do not undertake active ownership activities.
- No, we do not undertake active ownership activities to encourage TCFD adoption.
