

CLIMATE TRANSPARENCY REPORT

2019

Ecofi Investissements

About the Climate-related Disclosure Indicators

Climate has been identified as a top priority for PRI signatories, with over 70% of asset owners reporting this as the most important long-term trend they are acting on.

The FSB Task Force's guidance on climate-related financial disclosure aim to create a single framework for disclosure on assessment and management of climate-related risk. The recommendations, supported by investors representing US\$22 trillion, identify four main disclosures, Governance, Strategy, Risk Management, Metrics and Targets, and include specific guidance for asset owners and managers.

As a result, the PRI introduced climate-related disclosure indicators that can be used to align with the TCFD recommendations in the 2019 PRI Reporting Framework.

About this report

This report is an export of only the climate-related indicators from the 2019 Reporting Framework response. The full Public Transparency Report is available here (https://reporting.unpri.org/surveys/PRI-reporting-framework-2019/-DCDA79A9-E1F8-4877-8929-1747C4650F80/00000000-0000-0000-0000-000000000000/doc/2/-%7C%7C*complete*%7C*public*/Merged/). It shows the responses to all the completed climate indicators, even those you chose to keep private. It is designed for your internal review or – if you wish - to share with your stakeholders.

The PRI will not publish this report on its website if you have designated your 2019 climate reporting as “private”. Otherwise, you will be able to access the Climate Transparency Report of your organisation and that of other signatories on the [PRI website](#) and on the [Data Portal](#).

To easily locate information, there is a **Recommendation index** which summarises the indicators that signatories complete and disclose. The report presents information exactly as it was reported as per signatory preference. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory are presented in this report.

SG 01.4

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

Ecofi Investissements SRI process is based on two main evaluation steps:

- **Evaluation ESG performance** : evaluation of issuers based on the methodology developed by Vigeo with an overweight in the quantitative indicators of results and those of the "Touche ECOFI" that have been chosen according to our values. The final rating is calculated through the ESG dimensions, which represents 70% of the overall rating and the "Touche Ecofi" which represents 30%.
- **Exclusion of the ESG controversies**. This filter excludes the investments in companies involved in significant incidents. These controversies are ranked and evaluated on a scale of 1 (low severity) to 5 (high severity). The process also excludes investments in "tax and judicial havens", as well as for issuers having registered their head office in one of these countries. The process exclude also companies involved in cluster bombs and landmines production.

In 2018 Ecofi Investissements has updated it SRI processus which is composed by 3 steps : controversial industries (coal, gambling, tobacco) and tax heavens exclusion, ESG evaluation and controversies exclusion. The new SRI process is applied to 100% of our assets (except mandates, index funds and external managed funds).

Ecofi Investissements ESG methodology which is applied to all companies and countries invested by our SRI funds, integrates the analysis of climate-related risks and opportunities. In our ESG score formule, 23% of our analysis is dedicated to environmental and climatic factors. Our analysis allows us to invest in companies highly implicated in climate issues and to support several dialogue initiatives about this issue. Our SRI process excludes companies which do not adopt a responsible behavior which could constitute a risk. In addition, our strategy of excluding serious controversies also allows us to filter out companies considered as risky.

We still don't calculate the allignement between our portfolio and the scenario 2°.
