RI TRANSPARENCY REPORT

2020

Baloise Asset Management

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

SG 01.4

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

For Baloise, sustainable development and the insurance and financial services business have significant similarities: long-term activities and responsible handling of risks and resources. Baloise wishes to secure its own business operations and this its employees' jobs in the long term, and actively shape social transformation as a corporate citizen. We are confident that the integration of ESG risks in our investment process will have a positive effect on the return risk profile, and that we will be able to reduce ESG risks that have a financial impact. As a result, we consider this integration to be an additional risk management tool. We understand responsible investment as the inclusion of ESG factors in investment decisions. We strive to act in the best interest of our clients, and any other stakeholder. We regularly review completed investments to ensure that all our various insurance units comply with the responsible investment policy. This is why we built a strong governance structure with the RI Committee and the RI Core Team.

SG 01.5

Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

Our responsible investment policy (RI policy) is an **integral part of the global corporate responsibility strategy of Baloise Group**. Baloise Asset Management is responsible for the general account (insurance assets) as well as for third party assets. We aim to apply wherever meaningful and desired one policy for our assets. Currently the scope of the policy refers to the general account insurance **equities and bonds including loans** which reflect nearly 60% of the insurance assets under management. In addition all self-managed money for third part investment is in scope of the RI-Policy.

Our responsible investment policy consists of **three strategic pillars**, as illustrated in the graph. We exclude companies on the basis of their business activities in the field of controversial weapons and their involvement in the coal sector (where this accounts for at least 30 per cent of their entire turnover). We also incorporate sustainability factors in our investment analysis, whereby companies must have at least a B rating (according to the data from the MSCI) to be included in the investment universe. We exercise our statutory voting rights too.

Our guiding principles for responsible investment

- Responsible investment requires collective measures. As of 2018, we are a signatory of the six principles of the Principles of Responsible Investment (PRI).
- A long-term, holistic investment horizon is essential in investment analysis for a positive risk/return profile. We therefore integrate ESG factors in the investment process.
- We regularly review completed investments to ensure that all our various insurance units comply with the responsible investment policy.
- We take our voting rights seriously. As a responsible shareholder, we exercise our statutory voting rights for Swiss stocks by following the principles of good and ethical corporate governance.
- We report on our activities in a transparent and proactive manner.

Baloise Asset Management also includes the **Real Estate division**. Baloise is one of the largest property owners in Switzerland. For us as a responsible investor, sustainable real estate investments and long-term returns are closely linked. For the benefit of our policyholders and investors, we use responsible property management to secure our earning power on a sustainable basis and improve the value of our properties.

Real estate consumes about 40% of the available primary energy and produces about 1/3 of CO2 emissions.¹ In order to optimize the energy efficiency of our building stock, we strive to reduce energy consumption primarily through the renovation of older buildings and replacement buildings, in addition to the acquisition of properties, portfolios and new construction projects. Our tenants benefit from lower operating costs. This can help to retain existing tenants and, on the other hand, to attract new tenants.

Our investment decisions combine financial goals, ecology and social challenges. We are convinced that demographic change (ageing of the population and reduction of household sizes) and new technologies (digitalisation) will lead to changing tenant needs and corresponding demand in the market. Through forward planning, we continuously review these needs in our investment decisions (e.g. small apartments) and maintain tenant satisfaction.

In the case of new construction projects, we strive for certification - in the case of renovations, this is checked on a situational basis. For this purpose, the consumption figures (energy and water consumption) of the properties are systematically recorded and evaluated. With the help of the cantonal building energy certificate (GEAK), the energy efficiency of each property is determined and concrete measures for improvement are derived.

SG 03.2 Describe your policy on managing potential conflicts of interest in the investment process.

There are several internal directives establishing rules and measures relating to the trading of securities and financial instruments derived therefrom.

Any intentional conduct that could result in a disadvantage for the company or the client (pension fund, collective investment scheme and others) is prohibited.

The requirements are set out in FINMA Circular 13/8 "Rules of Market Conduct" and the legal principles set out in the internal directive. Furthermore, compliance with the Code of Conduct, the "Insider" directive and the provisions in the declaration of loyalty of the asset management department is ensured.

FI 01.2 Describe your reasons for choosing a particular ESG incorporation strategy and how combinations of strategies are used.

Our responsible investment policy consists of three strategic pillars:

1) We exclude companies on the basis of their business activities in the field of controversial weapons and their involvement in the coal sector (where this accounts for at least 30 per cent of their entire turnover). 2) We also incorporate ESG factors in our investment analysis, whereby companies must have at least a B rating (according to the data from MSCI) to be included in the investment universe. 3) We exercise our statutory voting rights, too.

We apply pillars 1 and 2 in our bond investments. We are convinced that this approach helps us to improve our return/risk-profile.

FI 03	Mandatory	Public	Additional Assessed	PRI 1
--------------	------------------	---------------	----------------------------	--------------

FI 03.1 Indicate how you ensure that your ESG research process is robust:

- Comprehensive ESG research is undertaken internally to determine companies' activities; and products and/or services
- Issuers are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies
- Issuer information and/or ESG ratings are updated regularly to ensure ESG research is accurate
- Internal audits and regular reviews of ESG research are undertaken in a systematic way.
- A materiality/sustainability framework is created and regularly updated that includes all the key ESG risks and opportunities for each sector/country.
- Other, specify
- None of the above

FI 03.2 Describe how your ESG information or analysis is shared among your investment team.

- ESG information is held within a centralised database and is accessible to all investment staff
- ESG information is displayed on front office research platforms
- ESG information is a standard item on all individual issuer summaries, research notes, 'tear sheets', or similar documents
- Investment staff are required to discuss ESG information on issuers as a standard item during investment committee meetings
- Records capture how ESG information and research was incorporated into investment decisions
- Other, specify
