RI TRANSPARENCY REPORT

2020

Telligent Capital Management

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

SG 01.4

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

Telligent takes an active, long-term approach to investing. Our investment strategy incorporates a focus on fundamentals while looking for opportunities. The approach is forward looking. We implement a disciplined investment process which looks for high quality businesses with ethical governance.

ESG integration is a teamwide approach led by our CEO and research directors along with our operations team and sustainability director. The sector specific analysts identify materiality markers within their area of expertise. We work to understand materiality in Asia as we study each sector specific risk and opportunities to constantly fine tune our understanding of regional drivers.

It is our legal responsibility and ethical consideration to act in our clients best interests. As a responsible fiduciary we strive to exemplify global best practices for compliance and risk. To maximize our long-term value to our customers, it is our duty to also take a long term view and incorporate a wide spectrum of risks into our analysis.

Yes

SG 03.2	Describe your policy on managing potential conflicts of interest in the investment process.
----------------	---

Conflicts of interest may exist between various individuals and entities, including Telligent, Employees, the Funds, and current or prospective Investors. Any failure to identify or properly address a conflict can have severe negative repercussions for Telligent, its Employees, the Funds, and Investors. In some cases the improper handling of a conflict could result in litigation and/or disciplinary action. Telligent’s policies and procedures have been designed to identify and properly disclose, mitigate, and/or eliminate applicable conflicts of interest.

However, written policies and procedures cannot address every potential conflict, so Employees must use good judgment in identifying and responding appropriately to actual or apparent conflicts. Conflicts of interest that involve Telligent and/or its Employees on one hand, and the Funds and/or Investors on the other hand, will generally be fully disclosed and/or resolved in a way that favors the interests of the Funds and/or Investors over the interests of Telligent and its Employees. If an Employee believes that a conflict of interest has not been identified or appropriately addressed, that Employee should promptly bring the issue to the firm’s attention.

SG 07.2

For the roles for which you have RI oversight/accountability or implementation responsibilities, indicate how you execute these responsibilities.

As active investors we are driven to understand all of the material factors that determine the price of a security. We take a team approach to our ESG investment strategy.

Led by our CEO and research directors along with our operations team and Head of Sustainability, it's a teamwide discussion.

Our sector specific analysts identify materiality markers. Understanding materiality points in Asia comes from our years of experience and engagement with companies. We study each sector specific risk and opportunities and continue to fine tune our understanding of regional drivers. Governmental regulation, stranded assets and social unrest are factors that we need to understand and investigate in this continually changing marketplace.

HF 01.1

What is your rationale for adopting a policy to incorporate RI into the investment decision-making process? Please select all options that apply to your organisation.

- To provide a framework and ESG applicability to security selection (the strategy) and decision-making in Hedge Funds (e.g. breaking the strategy into different components and focus on risk/return).
- To provide a framework of the fund governance structure.
- Because ESG incorporation is perceived as a competitive advantage in the industry.
- Growing momentum of sustainable investing in Hedge Funds in the financial community.
