RI TRANSPARENCY REPORT

2020

Keys Asset Management

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Keys REIM has three major investment policies that form the basis of our responsible investment approach: the Corporate ESG Policy, the Socially Responsible Investing (SRI) Policy, currently in the process of being deployed on the Keys Selection fund; the ESG Stakeholder Engagement Policy, also in the process of being deployed on the Keys Selection fund.

Since 2018, the Group has embarked on a major initiative to improve its performance on ESG issues. In 2018, we established an executive-level ESG Committee, ensuring that ESG considerations are formally integrated into our decision-making processes at the highest levels.

As a result, **our three major policies have been built up during the year 2019 and will be deployed during the year 2020.**

Keys Asset Management is an asset management firm whose activities cover the entirety of the real estate investment cycle : development, management and asset restructuring. Our activities cover property management, asset restructuring and repositioning, and development financing.

We have a diversified portfolio across a range of asset classes: offices, shops, logistics and e-commerce, co-working, residential, hotels, and new uses. These are concentrated in Europe, and especially in France, in various dynamic economic hubs and regional metropolises.

The Group's investment strategy is based on our vision of a real estate sector undergoing major changes. Today, energy transition and the digital revolution are bringing new ways of working and new models of collaborative consumption. In turn, these are driving major changes to the real estate sector: increasing obsolescence of housing stock; outdated office spaces; emergence of new real estate concepts and mixed urban projects; flexible user experiences. In this rapidly changing environment, Keys AM offers dynamic property management with a stable long-term return / risk ratio, based on our integrated expertise across the property value chain. Keys AM favours eco-responsible real estate and uses compliance with environmental standards as a lever for asset valuation, particularly in terms of energy performance.

- Yes

SG 03.2	Describe your policy on managing potential conflicts of interest in the investment process.
---------	---

In accordance with the European Directive "MIF" (Marché d'Instruments Financiers), Keys REIM has formalised a policy for managing conflicts of interest and implemented specific organisational (means and procedures) and control measures to prevent, identify and manage situations of conflicts of interest that may affect the interests of its clients.

The purpose of this policy is to identify the main measures to achieve this objective of managing conflicts of interest. Nevertheless, if any conflicts of interest arise, they will be managed in the client's interest, i.e. in a fair manner and by providing complete and appropriate information.

Thus Keys REIM is authorized, depending on the conflict of interest situations, to :

- carry out the activity or operation to the extent that the organization appropriately manages the potential conflict of interest situation;
- inform the client in the event that certain conflicts of interest may remain and communicate the necessary information on their nature and origin;
- if applicable, not to carry out the activity or transaction giving rise to a conflict of interest.
