RI TRANSPARENCY REPORT

2017

Markham Rae

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2017 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

SG 03.1 Indicate if your organisation has a policy on managing potential conflicts of interest in the investment process.

Yes

SG 03.2 Describe your policy on managing potential conflicts of interest in the investment process.

Independence of decision making

It is conceivable that Markham Rae could be unduly influenced by the interests of a client. Therefore, our policy is to avoid influence on our decision making by having a robust corporate governance infrastructure, in

which clients are neither represented or have a casting vote on committees. Our independence of decision making is further supported by a Fair Allocation policy and a formal Investment Approach.

Personal Interests

To manage potential conflicts associated with outside business interests, we require staff to declare personal interests and to disregard the interest when acting on behalf of clients.

Personal dealing

Staff are required to comply with our Personal Account Dealing Policy, which amongst other things requires staff to obtain Compliance approval before dealing.

Gifts

Staff are required to comply with our Gift and Entertainment policy, which amongst other things states that gifts cannot be given or accepted, unless it can be demonstrated that no conflict of interest is created by doing so.

No

SG 07.2 For the roles for which you have RI oversight/accountability or implementation responsibilities, indicate how you execute these responsibilities.

The ESG Officer reports directly to the Board of Partners, and ensures that all investment activity undertaken by the firm is assessed for relevance for the applicability of ESG considerations into investment processes. Currently, given the trading nature of firm activities, rather than investment nature, ESG considerations were not relevant to trading decisions. The ESG Officer therefore monitors that firm activities are not extending beyond mandated trading activity, and identifies future investment strategies where investment activity will cause ESG considerations to have greater relevance.
