

CLIMATE TRANSPARENCY REPORT 2019

AgCAP

About the Climate-related Disclosure Indicators

Climate has been identified as a top priority for PRI signatories, with over 70% of asset owners reporting this as the most important long-term trend they are acting on.

The FSB Task Force's guidance on climate-related financial disclosure aim to create a single framework for disclosure on assessment and management of climate-related risk. The recommendations, supported by investors representing US\$22 trillion, identify four main disclosures, Governance, Strategy, Risk Management, Metrics and Targets, and include specific guidance for asset owners and managers.

As a result, the PRI introduced climate-related disclosure indicators that can be used to align with the TCFD recommendations in the 2019 PRI Reporting Framework.

About this report

This report is an export of only the climate-related indicators from the 2019 Reporting Framework response. The full Public Transparency Report is available here (https://reporting.unpri.org/surveys/PRI-reporting-framework-2019/-9AB9FA7B-C5D0-4D8B-9B39-E899E57D51E3/00000000-0000-0000-0000-000000000000/doc/2/-%7C%7C*complete*%7C*public*/Merged/). It shows the responses to all the completed climate indicators, even those you chose to keep private. It is designed for your internal review or – if you wish - to share with your stakeholders.

The PRI will not publish this report on its website if you have designated your 2019 climate reporting as “private”. Otherwise, you will be able to access the Climate Transparency Report of your organisation and that of other signatories on the [PRI website](#) and on the [Data Portal](#).

To easily locate information, there is a **Recommendation index** which summarises the indicators that signatories complete and disclose. The report presents information exactly as it was reported as per signatory preference. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory are presented in this report.

General

New selection options have been added to this indicator. Please review your prefilled responses carefully.

SG 01.1

Indicate if you have an investment policy that covers your responsible investment approach.

Yes

SG 01.2

Indicate the components/types and coverage of your policy.

Select all that apply

Policy components/types	Coverage by AUM
<input checked="" type="checkbox"/> Policy setting out your overall approach <input checked="" type="checkbox"/> Formalised guidelines on environmental factors <input checked="" type="checkbox"/> Formalised guidelines on social factors <input checked="" type="checkbox"/> Formalised guidelines on corporate governance factors <input type="checkbox"/> Fiduciary (or equivalent) duties <input type="checkbox"/> Asset class-specific RI guidelines <input type="checkbox"/> Sector specific RI guidelines <input type="checkbox"/> Screening / exclusions policy <input type="checkbox"/> Other, specify (1) <input type="checkbox"/> Other, specify(2)	<input checked="" type="radio"/> Applicable policies cover all AUM <input type="radio"/> Applicable policies cover a majority of AUM <input type="radio"/> Applicable policies cover a minority of AUM

SG 01.3

Indicate if the investment policy covers any of the following

- Your organisation's definition of ESG and/or responsible investment and it's relation to investments
- Your investment objectives that take ESG factors/real economy influence into account
- Time horizon of your investment
- Governance structure of organisational ESG responsibilities
- ESG incorporation approaches
- Active ownership approaches
- Reporting
- Climate change
- Understanding and incorporating client / beneficiary sustainability preferences
- Other RI considerations, specify (1)
- Other RI considerations, specify (2)

SG 01.4

Describe your organisation’s investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

AgCAP has investment policies, procedures and systems that are designed to meet our sustainability objectives, which encompass financial, social and environmental dimensions. AgCAP and the Sustainable Agriculture Fund both have Strategic Plans, with the systems and resources to deliver on these plans outlined in AgCAP’s Business Management Plan.

Specific to the Sustainable Agriculture Fund, the investment strategy was to provide institutional investors with an investment in Australian broadacre farmland assets that are diversified by geography, sector and water resource and which provide diversification benefits for traditional bond and equity portfolios.

To deliver on these benefits, SAF’s investment criteria requires investments to be in assets that are land-rich and produce agricultural commodities that have deep global markets. The selection of assets must fit within SAF’s overall portfolio objectives which specifically requires climate change factors to be considered when investing.

These investments are then managed directly by AgCAP in accordance with the fund’s sustainability objectives which have economic, environmental and social dimensions. Sustainability for SAF is defined as meeting the needs of present communities without compromising the ability of future generations to meet their own needs.

SG 01.5

Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

Further to SG 01.4, AgCAP maintains social and environmental responsibilities as a core component of its investment approach. The social dimension relates to SAF maintaining a social licence to operate. There are multiple aspects of social license. Firstly, an active community involvement is required with SAF employees being involved in community activities. Secondly, as Australian agriculture goes through long-term structural change and many people are displaced from traditional generational farming roles, AgCAP is in a position to provide young farmers with rewarding careers. Thirdly, business practices and organisational culture are implemented based on ethical and fair dealing with contractors and suppliers. Finally, social license is considered through the use of best management practices that respect the welfare of animals under our care and people under our employ.

The environmental dimension relates to preserving the environmental and economic value of agricultural assets. The overall objective is to produce more value with less inputs through the process of sustainable intensification. Direct impacts on the fund’s investments are managed through utilisation of best practice farm management, technology and other productivity and efficiency initiatives. Indirect impacts that effect the environment as a whole are also examined, such as managing and monitoring our carbon footprint. Additionally, AgCAP calculates the greenhouse gas emissions from its farmland activities according to the Australian National Greenhouse Gas Emissions Inventory Method. AgCAP commissioned a consultant to report on the environmental and sustainability activities of SAF in 2017/18.

Finally, the economic dimension concentrates on providing a fair return to our investors. Our sustainability goals require long-term decision-making, which in turn needs stability in management. To achieve this mandate to operate the farms for the long-term, AgCAP must deliver satisfactory returns to our investors. This means operating the assets efficiently and profitably, with the appropriate corporate governance systems to give investors confidence that they are being operated in their interests and accordance with the investment strategy.

General

**SG 07.5
CC**

Indicate the roles in the organisation that have oversight, accountability and/or management responsibilities for climate-related issues.

Board members or trustees

- Oversight/accountability for climate-related issues
- Assessment and management of climate-related issues
- No responsibility for climate-related issues

Chief Executive Officer (CEO), Chief Investment Officer (CIO), Chief Risk Officer (CRO), Investment Committee

- Oversight/accountability for climate-related issues
- Assessment and management of climate-related issues
- No responsibility for climate-related issues

Portfolio managers

- Oversight/accountability for climate-related issues
- Assessment and management of climate-related issues
- No responsibility for climate-related issues

Investment analysts

- Oversight/accountability for climate-related issues
- Assessment and management of climate-related issues
- No responsibility for climate-related issues

Investor relations

- Oversight/accountability for climate-related issues
- Assessment and management of climate-related issues
- No responsibility for climate-related issues

External managers or service providers

- Oversight/accountability for climate-related issues
- Assessment and management of climate-related issues
- No responsibility for climate-related issues

ESG issues in asset allocation

SG 13	Mandatory	Public	Descriptive	PRI 1
-------	-----------	--------	-------------	-------

SG 13.1 Indicate whether the organisation undertakes scenario analysis and/or modelling and provide a description of the scenario analysis (by asset class, sector, strategic asset allocation, etc.).

- Yes, to assess future ESG factors

Describe

AgCAP executes scenario analysis which includes factors representing the investment impacts of future environmental trends.

- Yes, to assess future climate-related risks and opportunities
- No, not to assess future ESG/climate-related issues

SG 13.2 Indicate if your organisation considers ESG issues in strategic asset allocation and/or allocation of assets between sectors or geographic markets.

We do the following

- Allocation between asset classes
- Determining fixed income duration
- Allocation of assets between geographic markets
- Sector weightings
- Other, specify
- We do not consider ESG issues in strategic asset allocation

SG 14	Mandatory to Report Voluntary to Disclose	Public	Additional Assessed	PRI 1
--------------	--	---------------	----------------------------	--------------

SG 14.1 Some investment risks and opportunities arise as a result of long term trends. Indicate which of the following are considered.

- Changing demographics
- Climate change
- Resource scarcity
- Technological developments
- Other, specify(1)
- Other, specify(2)
- None of the above

SG 14.2 Indicate which of the following activities you have undertaken to respond to climate change risk and opportunity

- Established a climate change sensitive or climate change integrated asset allocation strategy
- Targeted low carbon or climate resilient investments

Specify the AUM invested in low carbon and climate resilient portfolios, funds, strategies or asset classes.

	trillions	billions	millions	thousands	hundreds
Total AUM				78	155
Currency	AUD				
Assets in USD				57	639

Specify the framework or taxonomy used.

Following the FY17 reporting period, AgCAP appointed a Research Scientist that focused on the sustainability approach that AgCAP took within its investments. A report on Greenhouse Gas emissions from 2012-2017 was completed in May 2018.

- Phase out your investments in your fossil fuel holdings
- Reduced portfolio exposure to emissions intensive or fossil fuel holdings
- Used emissions data or analysis to inform investment decision making
- Sought climate change integration by companies
- Sought climate supportive policy from governments
- Other, specify
- None of the above

SG 14.3 Indicate which of the following tools the organisation uses to manage climate-related risks and opportunities.

- Scenario analysis
- Disclosures on emissions risks to clients/trustees/management/beneficiaries
- Climate-related targets
- Encouraging internal and/or external portfolio managers to monitor emissions risks
- Emissions-risk monitoring and reporting are formalised into contracts when appointing managers
- Weighted average carbon intensity
- Carbon footprint (scope 1 and 2)
- Portfolio carbon footprint
- Total carbon emissions
- Carbon intensity
- Exposure to carbon-related assets
- Other emissions metrics
- Other, specify
- None of the above

SG 15	Mandatory to Report Voluntary to Disclose	Public	Descriptive	PRI 1
--------------	--	---------------	--------------------	--------------

SG 15.1 Indicate if your organisation allocates assets to, or manages, funds based on specific environmental and social themed areas.

Yes

SG 15.2 Indicate the percentage of your total AUM invested in environmental and social themed areas.

%

100

SG 15.3

Specify which thematic area(s) you invest in, indicate the percentage of your AUM in the particular asset class and provide a brief description.

Area

- Energy efficiency / Clean technology
- Renewable energy
- Green buildings
- Sustainable forestry
- Sustainable agriculture

Asset class invested

- Cash

% of AUM

100

Brief description and measures of investment

The SAF portfolio invested in Australian farmland assets. It invested in broadacre agriculture assets that were selected under specific selection criteria in relation to land intensity, agricultural enterprise, geography, water resource and anticipated future performance under climate change scenarios.

- Microfinance
- SME financing
- Social enterprise / community investing
- Affordable housing
- Education
- Global health
- Water

Asset class invested

- Cash

% of AUM

100

Brief description and measures of investment

Sustainable Agriculture Fund's investment in water was ancillary to its investment in farmland.

- Other area, specify

No
