

CLIMATE TRANSPARENCY REPORT 2020

BT Funds Management (NZ) Limited

About the Climate-related Disclosure Indicators

Climate has been identified as a top priority for PRI signatories, with over 70% of asset owners reporting this as the most important long-term trend they are acting on.

The FSB Task Force's guidance on climate-related financial disclosure aim to create a single framework for disclosure on assessment and management of climate-related risk. The recommendations, supported by investors representing US\$22 trillion, identify four main disclosures, Governance, Strategy, Risk Management, Metrics and Targets, and include specific guidance for asset owners and managers.

As a result, the PRI introduced climate-related disclosure indicators that can be used to align with the TCFD recommendations in the 2020 PRI Reporting Framework.

About this report

This report is an export of only the climate-related indicators from the 2020 Reporting Framework response. The full Public Transparency Report is available here (<https://reporting.unpri.org/surveys/PRI-reporting-framework-2020/-72B7B2A6-6186-44D5-9020-AE65F92822E1/79894dbc337a40828d895f9402aa63de/html/2/?lang=en&a=1>). It shows the responses to all the completed climate indicators, even those you chose to keep private. It is designed for your internal review or – if you wish - to share with your stakeholders.

The PRI will not publish this report on its website if you have designated your 2020 climate reporting as “private”. Otherwise, you will be able to access the Climate Transparency Report of your organisation and that of other signatories on the [PRI website](#) and on the [Data Portal](#).

To easily locate information, there is a **Recommendation index** which summarises the indicators that signatories complete and disclose. The report presents information exactly as it was reported as per signatory preference. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory are presented in this report.

Describe

- As part of the ESG Credit Policy climate-related risks form part of the lending process for transaction-managed (commercial) lending. WNZL published its first Climate Change Impact Report in 2018, which used scenario analysis to quantify the possible impact of two transition scenarios on NZ's economy. WNZL is currently undertaking an in depth climate risk assessment focussing on the financial impacts of particular physical climate risks.
- BTNZ is currently developing a climate change strategy, which will incorporate identifying transition and managing material climate-related risks and opportunities across the BTNZ funds. This strategy is due to be presented to the BT Investment Committee in May 2020 and the BTNZ Board in June 2020, as part of a wider review of our responsible investment strategy.
