

Environmental

The greatest threat to our planet is the belief that someone else will save it

	Environmental Category	Best Practice
1	Carbon Emissions	Have strong programs in place to reduce the carbon intensity of its operations.
2	Carbon Emissions	Have track record of performance.
3	Carbon Emissions	Have significant targets.
4	Toxic Emissions & Waste	Have strong programs in place to manage risk of emissions occurring
5	Toxic Emissions & Waste	Have strong programs in place to reduce the emissions and reduce waste going to landfills.
6	Toxic Emissions & Waste	Have significant targets
7	Toxic Emissions & Waste	Have track record of performance
8	Water Stress	Strong programs in place to manage and reduce water consumption
9	Water Stress	Have track record of performance
10	Product Carbon Footprint	Strong programs to reduce the carbon intensity of products-include raw materials, manufacturing, suppliers, transportation & logistics, distribution and storage.
11	Products	Assess the focus on development of environmentally friendly products
12	Environmental Risk Exposure	Avoid/assess companies that have a high exposure or high risk to environmental impact-carbon and air emissions, and waste (especially hazardous).
13	Environmental Risk Exposure	Avoid/assess companies whose products have a high impact in the production or the use of their products.
14	Packaging Material and Waste	Strong program to reduce packaging/weight and disposal. Track record of performance.
15	Alternative Clean Tech Energy	Efforts to use clean energy
16	Product Safety & Quality	Strong programs in place to protect from harm of product
17	Product Inputs	Strong programs in place for sourcing of raw materials sustainably
