RI TRANSPARENCY REPORT

2017

Foundation North

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2017 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

SG 01.5

Describe your organisation's investment principles, and overall investment strategy, and how they consider ESG factors and real economy impact.

The Foundation's approach to investing is framed by a set of clearly defined overarching beliefs that drive the investment decisions. Related to the question and taken from the Foundations SIPO are;

4. Investment Beliefs

4.1 Strong governance and well-defined decision-making structures enable sound investment decision making.

4.2 The investment horizon of the Foundation is long-term and setting an Asset Allocation that is appropriate to the objectives and risk tolerance is the most important decision to be made as it is the primary driver of long-term success.

4.6 Responsible investors should have regard to the environmental, social and governance issues of companies in which they invest.

11. Responsible Investment Policy

In its fiduciary role the Foundation believes that environmental, social and corporate governance (ESG) issues can affect the performance of investment portfolios and in support of these beliefs the Foundation is a signatory to the United Nations Principles for Responsible Investment (UNPRI). The UNPRI embodies an internationally accepted framework for investors to manage ESG issues in a manner consistent with improving long-term investment returns.

Investment managers are selected by the Foundation with consideration given to their beliefs and practices relating to ESG issues.

The benchmark for responsible corporate behaviour is the UNGC.

SG 01.6

Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

Taken from the SIPO - Investment managers are selected by the Foundation with consideration given to their beliefs and practices relating to ESG issues. The Foundation may hold investments through pooled funds as an effective and cost efficient means of accessing some global markets. For such funds the Foundation recognises that it will have no influence over the structure of the product or securities held in the fund.

The Foundation has been undertaking a thorough review of its current SIPO. It remains a work in progress as the Foundation educates itself around alternative strategies and managers. Impacts on the portfolio are explored and where possible improvements implemented. A number of new initiatives have been incorporated into the responsible investment approach which will continually evolve. The Foundations asset consultant now provides quarterly ESG reporting evaluating the activities of Fund Managers. The objective being to understand a complete picture of the

ESG attributes of all managers held in the portfolio. The Foundation has already moved to initially exclude tobacco from its Developed and Emerging Market Equity pooled funds. Further exclusions are currently under consideration.

For the roles for which you have RI oversight/accountability or implementation responsibilities, indicate how you execute these responsibilities.

Due to limited internal resources the Foundation relies on it's asset consultant (Cambridge Associates) to provide specific ESG monitoring at the quarterly meeting of the Investment Committee. Cambridge Associates utilise the MSCI ESG Monitoring tool to identify any areas of potential concern to Trustees. The Foundation also relies on fund managers to provide ad-hoc summaries of proxy voting and where possible ESG type reporting, covering examples of collaborative engagement, sustainability engagement and or thematic commentary.

Recommendations for changes to the Responsible Investment Policy (part of the Foundations SIPO) are made by staff to the Investment Committee for subsequent approval by the Board.

The Foundation has already moved to exclude tobacco from it's listed equity mandates (pooled Developed and Emerging Markets Equity funds) and will consider futher exclusions as part of the on-going review of its Responsible Investment Policy.

SAM 02.2

Provide a brief description of how your organisation includes responsible investment considerations in your investment manager selection, appointment and monitoring processes.

Foundation North's advisor/consultant, Cambridge Associates has a dedicated Mission-Related Investing (MRI) practice that actively integrates environmental, social and corporate governance (ESG) criteria in their manager due diligence process. All managers in Cambridge Associates' research database are required to complete specific ESG-related questionnaires to ascertain the managers':

- Thought process on ESG/SRI
- UNPRI Signatory Status
- Level of engagement/advocacy on ESG issues

· Extent of ESG integration within the portfolio

In its due diligence, Cambridge assesses whether ESG factors are considered within a manager's investment process and engage portfolio managers on distinct approaches and fund-specific nuances to ESG integration. For manager selection and appointment, clear and specific consideration will be evaluated regarding the manager's ESG policy and exposures in relation to the stated objectives from Foundation North's Responsible Investment Policy. From a monitoring perspective, Cambridge leverages analytic tools such as Bloomberg and MSCI ESG to quantitatively evaluate portfolio ESG risks and exposures.

SAM 12.2 Additional information.

In its fiduciary role the Foundation believes that ESG issues affect the performance of investment portfolios. Before inclusion into the portfolio, a prospective manager is evaluated based on its existing ESG Policy, level of integration of ESG issues and exposure to industries that run counter to the Foundation's mission and values. Over the past year the Foundation has taken increased measures to screen against cluster munitions and tobacco within portfolio holdings due to the inconsistency with the Foundation's values. Recognising the importance of ongoing portfolio monitoring, the Foundation has also worked collaboratively with its advisor over the past year to understand the ESG considerations and impact of each investment in tandem with establishing ESG measurements, guidelines and reporting frameworks for the Foundation's managers and prospective managers on a go-forward basis.
