RI TRANSPARENCY REPORT

2020

Majedie Asset Management Limited

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

| Symbol | Status |
|--------|---|
| ✓ | The signatory has completed all mandatory parts of this indicator |
| ☑ | The signatory has completed some parts of this indicator |
| 🔒 | This indicator was not relevant for this signatory |
| - | The signatory did not complete any part of this indicator |
| Ⓜ | The signatory has flagged this indicator for internal review |

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

SG 01.4

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

We see our role as fund managers as investing in those companies that represent the best opportunities for our clients in terms of financial return and also performance across the ESG spectrum. Our Responsible Capitalism approach does precisely this -- as part of our fundamental investment process, we assess the key risks and opportunities (both financial and ESG related) of our investments. This analysis impacts our conviction level in our companies which, in turn, impacts our buy, sell and hold decisions.

Our approach is not about box ticking; it's not an overlay or a screening service. Rather, it is a process born out of our long-held belief that our role is to make a return for our clients, responsibly. For this, we must understand all the key, material issues that our holdings face so that we can determine their ESG resiliency and estimate their longer-term performance across the whole of their operations.

Our Responsible Capitalism approach focuses on engaging with our holdings on their material issues and on continually encouraging our companies to adopt best practice across their entire business. We also vote our proxies for all of the companies in which we invest for our clients.

LEI 01.2

Describe your organisation's approach to ESG incorporation and the reasons for choosing the particular strategy/strategies.

ESG integration for us means that we undertake materiality assessment on all of our holdings and that this assessment is updated at least annually, but in practice, this is done more frequently. To undertake materiality assessment, we examine all the factors of a particular company, including (but not limited to) its results, valuation, environmental impacts, the macro environment in which it is operating, balance sheet strength, its unique set of risks and opportunities across the spectrum of its business, margin growth, its supply chain, cyber security, and any changes in legislation that could impact on the group's ability to operate.

LEA 12.2

Provide an overview of how you ensure that your agreed-upon voting policy is adhered to, giving details of your approach when exceptions to the policy are made.

Where a management recommendation and our proxy voting research provider's recommendation are in alignment we will be minded to vote in favour, except where items concern approval of political donations and expenditure, where we will be minded to vote against. Where there is divergence, the relevant Majedie fund manager will make a decision on how to vote.

We also scrutinise in particular the recommendations of management and ISS in the UK small cap space.
