RI TRANSPARENCY REPORT

2018

Leapfrog Investments

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2018 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

----------------	--

LeapFrog Investments seeks to make minority and majority growth investments in companies operating in Africa and South and Southeast Asia that provide relevant, affordable and high-quality financial and healthcare products and services to emerging consumers. With a focus on the emerging consumer and with integrated financial and social goals, LeapFrog continues to invest in the rise of a new emerging consumer class, who are the nearly 4 billion low-income people globally earning between USD 2 and USD 10 per person per day. In making fund investments, LeapFrog is guided by 2 overarching objectives based on our profit-with-purpose model: achieving top quartile financial returns and fulfilling the declared social targets of the fund. For Fund I the declared goal was reaching 25 million emerging consumers and households, followed by Fund II's goal of reaching a combined 50 million low income people across Africa and Asia.

All ESG factors and real economy impact are outlined in the form of policies in LeapFrog's Responsible Investment Code (RIC). The RIC is formally adopted (in shareholder agreements) by all portfolio companies. The RIC requires a dedication to improving environmental outcomes where possible and adherence to an exclusion list promoting conservation and long term sustainability.

Describe your policy on managing potential conflicts of interest in the investment process.

The governance documents of LeapFrog funds contain clear rules for allocating opportunities between the funds as well as with future funds, typically by giving preference to the older fund. Written conflict of interest policies guard against any improper dealings with members of the LeapFrog team. Team members are also required periodically to disclose any investment interests they hold in companies with which LeapFrog has significant business relationships.
