RI TRANSPARENCY REPORT

2020

Union Mutualiste Retraite

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

OO 11.3b

If your organisation does not integrate ESG factors into investment decisions on your externally managed assets, explain why not.

Today, UMR integrates ESG in each asset class it owns. An exception is made for the cash since most of it is available on bank accounts which unfortunately do not integrate ESG.

However, part of the cash (around 6%) is invested in monetary funds that integrate ESG notations and sectors exclusions.

OO 11.4

Provide a brief description of how your organisation includes responsible investment considerations in your investment manager selection, appointment and monitoring processes.

For each investment, UMR sends a due dilligence questionnaire which integrates ESG.

Some of the questions mention:

- **ESG Charters:** that might have been signed by the investment company (which one(s) ? , since when ?)
- **The Type of ESG Integration:** such as exclusions / best in class or other methodologies.
- **ESG Labels:** Is the company / fund registered in a label ? Which one ?
- **Energy Transition Approach:** what is the company approach regarding the article 173 (loi sur la transition énergétique) ?
- **Votes Policy :** Does the company have one ? Please send it.

Then, the investment idea is analyzed internally (for its financial and extra-financial criterions) and presented to the investment commission which usually rejects investments propositions if they judge their ESG integration profiles too weak.

SG 01.4

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

ESG integration is a way to **improve risk surveillance of financial assets**, including environmental, social and governance factors to "classical" financial indicators.

UMR's investment strategy integrates:

1. **The evaluation of the climate risks** in order to better protect the portfolio against negative consequences of global warming.
2. **The reduction of GhG emissions:** by screening both fixed income and stocks portfolios' carbon footprint.
3. **The contribution to sustainable development:** by investing in products and sectors that offer social & environmental benefits (such as High Quality Environmental real estate, infrastructure projects [green energy production] or private equity).

It also allocates parts of its portfolio in **thematical funds** that offer a specific impact such as microfinance or social responsibility funds (Novess).

In addition, UMR have set a few **sector exclusions** that concern : tobacco, alcohol, gambling and anti-personal & cluster ammunitions.

UMR encourages its historical partners to adopt better ESG practices and integrates ESG management and processes in its DDQ for new investments.

Scope and process	During the year, UMR investment team has met a Tier 1 asset manager in order to have a presentation about its private debt fund. The presentation did not mention ESG and answers given in the DDQ were judged too weak since the company was just starting implementing extra financial analysis.
Outcomes	Since the asset manager has been judged too weak on ESG criteria, UMR investment team has decided not to invest in the fund but keep that manager in its watchlist. The decision could be reviewed in the future if the company demonstrates a real improvement on those aspects.

LEA 12.1

Indicate how you typically make your (proxy) voting decisions.

Approach

- We use our own research or voting team and make voting decisions without the use of service providers.
- We hire service providers who make voting recommendations and/or provide research that we use to guide our voting decisions.
- We hire service providers who make voting decisions on our behalf, except in some pre-defined scenarios where we review and make voting decisions.

Based on

- The service-provider voting policy we sign off on
- Our own voting policy
- Our clients` requests or policies
- Other (explain)
- We hire service providers who make voting decisions on our behalf.

LEA 12.2 Provide an overview of how you ensure that your agreed-upon voting policy is adhered to, giving details of your approach when exceptions to the policy are made.

Every year, we analyze our service providers policy votes and verify it still matches with our own. In case of differences of approaches, we contact the provider to verify why it is different and we have the possibility to ask the provider to change the policy for dedicated mandate.
