

CLIMATE TRANSPARENCY REPORT

2019

NEKKO CAPITAL

About the Climate-related Disclosure Indicators

Climate has been identified as a top priority for PRI signatories, with over 70% of asset owners reporting this as the most important long-term trend they are acting on.

The FSB Task Force's guidance on climate-related financial disclosure aim to create a single framework for disclosure on assessment and management of climate-related risk. The recommendations, supported by investors representing US\$22 trillion, identify four main disclosures, Governance, Strategy, Risk Management, Metrics and Targets, and include specific guidance for asset owners and managers.

As a result, the PRI introduced climate-related disclosure indicators that can be used to align with the TCFD recommendations in the 2019 PRI Reporting Framework.

About this report

This report is an export of only the climate-related indicators from the 2019 Reporting Framework response. The full Public Transparency Report is available here (https://reporting.unpri.org/surveys/PRI-reporting-framework-2019/-C7B0936A-D301-4BB3-A15F-C9E377564730/00000000-0000-0000-0000-000000000000/doc/2/-%7C%7C*complete*%7C*public*/Merged/). It shows the responses to all the completed climate indicators, even those you chose to keep private. It is designed for your internal review or – if you wish - to share with your stakeholders.

The PRI will not publish this report on its website if you have designated your 2019 climate reporting as “private”. Otherwise, you will be able to access the Climate Transparency Report of your organisation and that of other signatories on the [PRI website](#) and on the [Data Portal](#).

To easily locate information, there is a **Recommendation index** which summarises the indicators that signatories complete and disclose. The report presents information exactly as it was reported as per signatory preference. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory are presented in this report.

Nekko Capital positions itself as a Glocal VC, with the will to detect opportunities in early stages, to be able to invest as soon as the prospects validate their business models and to accompany them on a global scale.

strategic lines of investment:

Geography - The investment portfolio will be focused on investments in Spain (70%) and in the rest of Europe (30%).

Sector - The investments will be made in traditional sectors that have not yet been completely redefined by the digital transformation. In addition, we consider that, in such transformation, the network effect of businesses built around AI & Machine Learning, AR & VR and IoT will be significantly relevant.

Maturity Level - We will invest in start-up models, mature ones, in many cases accelerated and curated by Incubators, Venture Builders or prestigious accelerators. This way, both the growth of the business models and, therefore, their valuations will be accelerated.

Follow-on - The Fund will reserve approximately 42% of the funds to accompany investments made in previous investment rounds.

SG 01.5

Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

Nekko Capital has been set-up as a global and a diversified project from the start, and thus Nekko's talent and human resources policies are focused on building a balanced multicultural, multi-disciplinary team, ensuring gender and cultural diversity.
