RI TRANSPARENCY REPORT

2020

Segulah Advisor AB

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Segulah has initiated a systematic approach to responsible investment aiming to develop a process that integrates and provides clear guidance on the management of ESG issues in every part of the investment and ownership cycle. Segulah's RI policy covers all operations from fundraising and acquisitions, the active ownership and exit phases and all of the investment process stakeholders such as investors, potential targets, portfolio companies and potential buyers. Responsible investment and ownership is based on the view that Segulah as an active owner has a responsibility to manage the impact that it and its portfolio companies' actions have on the environment and society while protecting and creating long-term value for our investors. The ESG work conducted by the portfolio companies within this context differs but aims to identify value creation opportunities that ESG issues provide and to avoid risks that has a negative impact on long-term value.

Overview

PE 01	Voluntary	Public	Descriptive	PRI 1-6
-------	-----------	--------	-------------	---------

PE 01.1	Provide a brief overview of your organisation's approach to responsible investment in private equity.
---------	---

Segulah shall, through active ownership, create profitable growth in the companies we own by bringing focus, expertise and capital. Our basic idea of responsible investment and ownership is based on the view that we as an active owner have the responsibility to manage the impact that our own and our portfolio companies' actions have on the environment, to protect and create value for our stakeholders.

To reflect this, Segulah has devised a Responsible Investment Policy that takes into account environmental, social and governance matters in each part of the investment and ownership cycle. In short Segulahs guidelines are summarized below:

Segulah build relationships with investors who share our fundamental philosophy of responsible investment and ownership

Segulah take into account ESG issues into our investment decisions and these are an integral part of our due diligence process

Segulah require our portfolio companies to establish processes for working with ESG issues

Segulah assess the potential buyer from a responsible investment perspective and communicate the impact of our companies' integrated work with ESG issues.

Segulah shall, through active ownership, create profitable growth in the companies we own by bringing focus, expertise and capital. Our basic idea of responsible investment and ownership is based on the view that we as an active owner have the responsibility to manage the impact that our own and our portfolio companies' actions have on the environment, to protect and create value for our stakeholders.

To reflect this, Segulah has devised a Responsible Investment Policy that takes into account environmental, social and governance matters in each part of the investment and ownership cycle. In short Segulahs guidelines are summarized below:

Segulah build relationships with investors who share our fundamental philosophy of responsible investment and ownership

Segulah take into account ESG issues into our investment decisions and these are an integral part of our due diligence process

Segulah require our portfolio companies to establish processes for working with ESG issues

Segulah assess the potential buyer from a responsible investment perspective and communicate the impact of our companies' integrated work with ESG issues.

- Our investment activities are not guided by a responsible investment policy
- We do not have a responsible investment policy
