# RI TRANSPARENCY REPORT

## 2018

Palatine Private Equity LLP

## About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2018 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

## Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

<b>SG 01.4</b>	Describe your organisation's investment principles and overall investment strategy, and how they consider ESG factors and real economy impact.
----------------	--

Our Investment Code sets out our stance and Working Principles, as well as the management commitment to support and resource its implementation. We do not have a separate 'Responsible Investment Policy' - our Investment Code stands for the way we do business in all our investment undertakings.

The importance of taking ESG matters into consideration, and of adhering to the Palatine pre and post-deal processes for managing ESG risks and opportunities, is understood and talked about by the Partners, the Investment Team and the wider team in everyday business.

Palatine have recently raised an impact Fund which will follow the ESG investment principles outlined above and invest in companies with a measurable positive social or environmental impact, while targeting market-rate private equity returns.

<b>SG 01.5</b>	Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]
----------------	--

There is a clear understanding and expectation that ESG matters will be identified and addressed at all stages of the investment cycle. We have adopted our own ESG profiling structure, called the Palatine 6 Pillars of ESG. This expands the headline categories of Environment, Social and Governance out into themes that are readily recognised as being relevant to running a robust and sustainable business

Pre-deal we have a defined, stepwise process for screening, profiling and weighing ESG matters in the pre-deal phase, with a series of 'expert tools' to support team members as they progress through the sequence towards final Investment Committee decision. This also begins the process of alerting the Board and the senior management team of the target company that ESG management will be important throughout the investment.

### SG 07.2

For the roles for which you have RI oversight/accountability or implementation responsibilities, indicate how you execute these responsibilities.

The Palatine team understands that having a reputation for rigour and expertise in proactively managing ESG matters in our portfolio is now part of the Palatine brand, and everyone has a responsibility to reinforce and uphold that reputation.

Our BVCA RI Awards are prominently displayed in our offices as both a reward for past efforts and an ongoing reminder of the importance of Responsible Investment to our business.

To aid understanding of what Responsible Investment and ESG management mean in practice we retain our Investment Manual as a reference guide for staff, and this is supplemented by coaching and updates from our in-house RI Ambassador, with periodic inputs from external expert advisors.

Our role as signatory to the PRI and in promoting the business case and benefits of Responsible Investment gives further prominence of RI within our business and provides useful feedback loops into our understanding and practice.

During due-diligence indicate if your organisation typically incorporates ESG issues when selecting private equity investments.

- Yes

PE 05.2

Describe your organisation's approach to incorporating ESG issues in private equity investment selection.

As an overarching measure we have ensured that all our staff, and in particular the Investment team, are aware of the many facets of material ESG matters that may arise in a business investment context. To support this we have carried out in-house training and have supplied regular updates on ESG matters alongside our comprehensive Responsible Investment Manual.

We have identified the key points in our investment selection where ESG investigations and reports should be in place to be effective and efficient. Action to be taken is set out as guidance in our detailed staff RI Manual and summarised in a deal flow diagram.

The investment selection process is supported by a series of 3 bespoke tools which allow us to drill down from a high level to focus on more detailed screening and due diligence in the most material areas of ESG for any particular sector and company, including an at-a-glance ESG scorecard. This manageable process provides an auditable trail of the basis of our decision making.

- Advice from external resources
- Other, specify
- We do not track this information

**PE 06.2**

Describe how this information is reported to, considered and documented by the Investment Committee or similar.

Pre-deal we use 3 tools in our ESG analysis and reporting.

Tool 1, is a pointer to sources of ESG news and information to help identify ESG matters in a sector.

Tool 2 is used to look at the business sector that a target company is in and the likely materiality matters that may have to be assessed prior to a deal.

Tool 3 is then used to look at the specific matters relating to the target company and to create a profile of what is relevant. It operates two levels, highlighting significant material matters such as e.g. carbon intensity, human rights violation risks, regulatory and compliance related risks, etc, but also digging deeper to fill out the picture for each material matter, as well as matters of general concern for any company, such as good Governance. We not only seek to identify ESG risks but also opportunities that might help to create value if the deal goes ahead. The output of Tool 3 is an ESG scorecard accompanied by commentary to note significant findings.

All investment papers have a detail section on ESG reporting the findings of the tools and tool 3 will be reviewed by the IC.
