RI TRANSPARENCY REPORT

2019

GQG Partners

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2019 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

SG 01.4

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

GQG seeks to optimize risk-adjusted returns, in part by considering ESG factors into its investment process to (1) understand the sustainability of earnings growth for the companies in which we invest and (2) seek to improve our investment opportunities to create shared value for our clients.

We integrate ESG considerations in our fundamental, bottom-up analysis of potential portfolio companies. We believe earnings drive stock prices and we view ESG shortcomings as a material risk to a company's ability to achieve sustainable earnings over the long-term. As a result, our bottom-up, fundmental analysis encompasses non-financial considerations. Issues such as labor relations, corporate culture, environmental responsibility, and overall goodwill are integral to our analysis and are given meaningful weight in our valuation of a potential portfolio company.

As long-term owners of our companies, we recognize the rights and responsibilities that come with equity ownership. Our core objective is to maximize the long-term returns to our investors and we believe that this is best achieved through ownership of companies with long-term sustainable earnings growth. Companies that act in the best interests of their shareholders are companies that have due regard for their other stakeholders.

SG 03	Mandatory	Public	Core Assessed	General
-------	-----------	--------	---------------	---------

SG 03.1	Indicate if your organisation has a policy on managing potential conflicts of interest in the investment process.
---------	---

Yes

SG 03.2	Describe your policy on managing potential conflicts of interest in the investment process.
---------	---

Where possible, GQG organizes its business activities in a way to avoid conflicts of interest. For example, we normally manage the firm's accounting pari passu, and allocate trades on a pro rata basis.

We disclose material conflicts of interest that we identify in our Form ADV. They include the following:

- Personal securities trading by our supervised persons
- Side-by-side management of accounts with performance fees
- Our advice and actions may differ among accounts.
- Potential conflicts in voting proxies (for instance proxies of firms that are our clients).
- Potential incentive to treat accounts in which supervised persons have proprietary interests preferentially.

We monitor conflicts on an on-going basis. Our Chief Compliance Officer, with the assistance of our General Counsel, conducts periodic assessments of our operational risks and potential conflicts of interests. Reports from these assessments are made available to our Board of Directors.

No

SG 03.3	Additional information. [Optional]
---------	------------------------------------

Below are further details of how we disclose material conflicts of interest:

- Personal securities trading by our supervised persons: We limit personal securities trading by our employees to purchases in our strategies, broad-based mutual funds/exchange traded funds, and US government securities. Prior approval from our Chief Compliance Officer is obtained before GQG employees or their immediate family members living in the same household can conduct personal securities trading.
- Side-by-side management of accounts with performance fees: Our policies and procedures require that we seek fair and equitable trade allocations among all clients, regardless of the type of fees we receive from the clients.
- Our advice and actions may differ among accounts: Our policies and procedures require that we manage accounts in the best interests of our clients and that we seek fair and equitable trade allocations among all clients.

- Potential conflicts in voting proxies (for instance proxies of firms that are our clients): Our portfolio management personnel do not take client relationships into consideration when evaluating companies, and if a material conflict of interest arises, our proxy voting policies address how we would vote proxies.
- Potential incentive to treat accounts in which supervised persons have proprietary interests preferentially: We have adopted procedures for allocation of portfolio transactions across multiple client accounts, including those of our supervised persons, on a fair and equitable basis over time.

LEI 01.2

Describe your organisation's approach to incorporation and the reasons for choosing the particular ESG incorporation strategy/strategies.

We integrate ESG considerations in our fundamental, bottom-up analysis of potential portfolio companies. We believe earnings drive stock prices and we view ESG shortcomings as a material risk to a company's ability to achieve sustainable earnings over the long term. As a result, our bottom-up fundamental analysis encompasses non-financial considerations. Issues such as labor relations, corporate culture, environmental responsibility, and overall goodwill are integral to our analysis and are given meaningful weight in our valuation of a potential portfolio company. Conversely, in our experience, companies that seek industry leadership in these areas often (we believe not coincidentally) have some of the best management teams and most durable competitive advantages.

Our Portfolio Manager, Rajiv Jain, has over 20 years' experience investing in global equities, and is aware of the corporate sustainability challenges and their impact on a company's valuation, particularly in emerging markets. He purposefully hired two analysts with experience in investigative journalism to vet aspects of a company that are often overlooked by classic Wall Street research. Investigating ESG and non-financial issues and assessing a company's less tangible, non-traditional assets are an important part of the analysts' role. These analysts interview regulators, unions, former employees and customers of target companies to enhance our understanding of a company's management culture and the broader eco-system within which it operates.

We also have a research analyst with a deep accounting background. His focused financial statement analysis assesses how aggressive or conservative a management team is with their financial decisions. This helps avoid companies that take undue risks to meet short-term financial projections, but can also be a leading indicator for human resources and compensation related issues, environmental impacts (via unexpected expenses and legal fees), and broader governance issues.

We also subscribe to ISS-Ethix, which provides ESG and reputational research. These ESG ratings are included and used as an informative source within our initial stock screening results. Beyond being built into our initial screens our analysts use this resource to review the ISS-Ethix ESG ratings and sub-ratings to potentially guide them toward additional ESG targeted research. In our investment thesis write-ups, analysts include a section that addresses any ESG/corporate responsibility concerns which are considered in our Portfolio Manager's investment decisions.

LEI 01.3	If assets are managed using a combination of ESG incorporation strategies, briefly describe how these combinations are used. [Optional]
-----------------	---

Our investment process commences with a screening process that is designed to generate a short list of around 350 companies across all sectors that demonstrate high and stable return on equity/return on assets (ROE/ROA). We believe that highly levered companies (relative to their peers) are indicative of a governance culture that is not in the long-term interests of shareholders. We therefore screen out companies at this stage where the high ROE/ROA can be attributed to excessive leverage. We subscribe to ISS-Ethix for reputational and ESG research and company ESG scores are integrated into this initial screening process.

 - other, explain
- We hire service provider(s) who make voting decisions on our behalf, except for some pre-defined scenarios where we review and make voting decisions.
- We hire service provider(s) who make voting decisions on our behalf.

LEA 12.2

Provide an overview of how you ensure your voting policy is adhered to, giving details of your approach when exceptions to the policy are made.

We vote proxies of companies owned by clients who have granted us voting authority, and clients can specifically request not to delegate proxy voting authority to us. In accordance with our fiduciary duty to clients and in compliance with Rule 206(4)-6 of the Advisers Act, we have adopted and implemented written policies and procedures governing the voting of client securities where we have this authority. All proxies that we receive are treated in accordance with these policies and procedures.

Our procedures are reasonably designed to assure that we vote every eligible share with the exception of shares domiciled in share blocking countries and certain ordinary shares in foreign markets. Share blocking countries restrict share transactions for various periods surrounding the meeting date. We have taken the position that share liquidity generally has a higher value than the vote and usually do not vote shares subject to transaction restrictions. Some international markets require some special powers of attorney to vote certain ordinary shares. These markets are few and our ordinary share holdings relatively modest when weighed against the onerous documentation requirements and generally we have determined not to attempt to qualify our proxy votes for these shares.
