RI TRANSPARENCY REPORT

2020

Troy Asset Management Limited

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

 No, we do not use fiduciary managers.

OO 06.6 Provide contextual information on your AUM asset class split. [Optional]

Troy Asset Management is predominantly a direct equity investment house however other asset classes are used for specific purposes within the different mandates.

Troy's UK Equity Income mandates invest indirectly in property and infrastructure Real Estate Investment Trusts ("REITs") to gain access to these asset classes via vehicles that provide liquidity, diversification and expertise in capital allocation.

Troy's Multi-Asset mandates hold cash, T-Bills, gold and UK Index Linked bonds and US Treasury Inflation-Protected Securities as protection against equity market volatility. US and UK government debt substantially accounts for all of Troy's Fixed Income and Money Market exposure.

The Environmental, Social & Governance ("ESG") integration and active ownership policies for long and short dated sovereign issues are the same. Troy holds no Fixed Income assets outside of sovereign issues.

Externally managed equities are predominantly held within Troy's Fund of Funds mandate and within private funds which represent some 4% of Troy's total AUM.

Troy's Fixed Income exposure is currently comprised of US and UK index linked sovereign debt. These assets are held in order to preserve the value of capital. As such the focus is on risk mitigation. Our aim is primarily to minimise liquidity risk, currency risk, default risk and the risk associated with inflation. Although we recognise the value that engagement could add given a wider portfolio of municipal or corporate debt, we do not feel that engagement with US and UK sovereign issuers would have a probability of delivering meaningful impact (as necessitated by the prioritisation of engagement guidelines in our RI policy).

OO 11.4 Provide a brief description of how your organisation includes responsible investment considerations in your investment manager selection, appointment and monitoring processes.

The incorporation of ESG within the selection of both listed property and infrastructure vehicles is conducted in the same way as any other listed equity investment. Both the management team and the underlying investments of any potential collective property or infrastructure investment trust are analysed both from a financial and ESG perspective. This analysis of management and business operations is conducted in the same way (and by the same team) as it would be for any other listed equity.

The monitoring process via meetings and ongoing analysis is also conducted in the same way as per other listed equities.

ESG risks are assessed according to our responsible investment policy and decisions are made according to the same criteria as laid out in paragraph 4. of Troy's investment policy (Environmental, Social and Governance risks within the Research Process).

ESG incorporation practices are now being incorporated into the fund selection and monitoring process for the funds-of-funds where listed equities are held indirectly as outlined above. This process will continue to evolve.

OO 11.5

For your externally managed pooled funds, describe any mechanisms in place to set expectations as part of the appointment or commitment process.

We are not prescriptive in our demands of external fund managers but do seek to understand how they incorporate ESG into their research process, how they engage with companies, and how ESG issues impact portfolio construction. We ask the fund managers we invest in to fill out an ESG-related due diligence questionnaire, provide details of their responsible investment policy and a record of how they have voted and engaged with companies. To get a more nuanced understanding of how ESG is incorporated at both a firm and fund level, we also ask ESG-related questions during our monitoring meetings with a fund manager. By maintaining a written record of these meetings, we are able to judge how a fund manager's investment process evolves over time.

SG 01.4	Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.
----------------	--

Troy's Investment Philosophy and Strategy:

Our aim is to protect investors' capital and to increase its value year on year. We believe that those who have money should concentrate on not losing it and therefore we focus on absolute rather than relative returns.

Our approach is conservative, with attention always paid to the downside risk of any investment. Only once we are satisfied that we understand the risk to which we are exposing our investors capital do we analyse the potential rewards of the investment. We consider that risk is not about underperforming a particular benchmark, but rather is defined by a permanent loss of an investor's capital. We judge the safety and attractiveness of asset classes and stocks not just relative to each other, but also relative to their own histories.

Finally, we adopt a long-term, long-only approach running concentrated portfolios with low turnover.

Troy's long-term and risk averse investment style means the integration of ESG factors and the principles of responsible investment are a natural fit with our investment philosophy and strategy as we seek to further improve the financial performance of our investments as well as promote sustainable capital markets and reduce systemic risks.

SG 01.5	Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]
----------------	--

Troy's policy on Responsible Investment has a particular focus on the fundamental integration of **environmental, social and governance factors** into Troy's research process, Troy's confirmation of its support for the **principles of to the Stewardship code**, the firm's **policy on engagement and on (proxy) voting**, and Troy's status as a **signatory to the UN Principles for Responsible Investment**.

The policy also references Troy's standalone policy on **conflicts of interest**.

Troy's Responsible Investment **policy covers all assets managed by Troy Asset Management** and is rooted in our long investment horizon and focus on capital preservation.

The policy was implemented in 2017 and is intended to be broad enough to capture all assets managed by Troy Asset Management.

The policy has been approved by Troy's executive committee and is reviewed on an annual basis.

The sole exception is the **screening and exclusions policy** which only currently applies to the assets managed within the Trojan Ethical Income Fund and Trojan Ethical Fund.

SG 03.2 Describe your policy on managing potential conflicts of interest in the investment process.

Troy has a Conflicts of Interest policy, with which all employees are expected to be familiar. Within the conflicts of interest framework is a Conflicts of Interest Register which identifies conflicts and sets out the management arrangements aimed at mitigating those respective conflicts. The first portion of this register deals with Trading and Investment Conflicts and makes explicit reference to the potential conflicts surrounding engagement and proxy voting. The policy and register are updated at least annually.

SG 07.2

For the roles for which you have RI oversight/accountability or implementation responsibilities, indicate how you execute these responsibilities.

Troy's CIO, Head of Research and Board have responsibility for oversight of Troy's responsible investment policies and objectives.

Troy's Head of Responsible Investment is responsible for the drafting of Troy's firm wide RI policies and objectives, with oversight from the CIO and Head of Research. He is also responsible for the implementation of Troy's RI policy and the associated systems, processes and training required to deliver Troy's responsible investment objectives. As of late 2019 he has dedicated analyst resource in support of this function.

Troy's Head of Responsible Investment is required to report to Troy's Board on an annual basis on the RI policy and its implementation.

The wider investment team (including all portfolio managers and analysts) have responsibility for the integration of ESG factors into their research and, alongside Troy's fund operations team, have responsibilities for voting and engagement.

Troy has appointed VigeoEiris to support the screening process for the Trojan Ethical Income Fund and to provide additional ESG research capability on a subset of Troy's stocks. ISS have been appointed to provide Troy's proxy voting platform and proxy voting research as well as broader ESG research. Lastly, Troy employed the services of the consultants Impactive Associates in 2018 in order provide support in the implementation of Troy's RI policy and to provide training to the investment team.

SG 07.3

SG 07.4

Additional information. [Optional]

Troy's approach to responsible investment is based on the premise that responsible investment should be conducted as part of the broader investment process rather than as an adjunct. As such the responsibility for implementation and oversight of the firm's policies and objectives is integrated into the wider investment team of 13 people.

Three members of the investment team have RI responsibilities specified within their job descriptions (with commensurate time allocations). These include Troy's Head of RI and Ethical Income Fund Manager, the manager of the Trojan Ethical Fund and the dedicated RI Analyst. However, all of these individuals roles are deliberately combined with significant investment management and analyst obligations.

All members of the investment team have RI obligations that form part of their staff appraisal process as of 2019.

LEI 01.2

Describe your organisation's approach to ESG incorporation and the reasons for choosing the particular strategy/strategies.

All of Troy's investment strategies follow the same investment philosophy. Our aim is to protect investors' capital and to increase its value year on year. The principle of first preserving investors' wealth means that Troy is first committed to properly assessing the risks of any potential investment, even before trying to quantify the potential return.

A significant part of this process is to understand and assess the significant factors that may impact the long-term returns from a particular business. It is within this context that our research team seeks to assess non-financial ESG factors. This is an integrated part of our wider analysis process, which includes, amongst other items, an assessment of the relevant business' strategy, financial performance and capital structure. Troy defines incorporation of an assessment of ESG factors within its investment research process as the

fundamental analysis of non-financial ESG factors that materially influence the potential long-term returns received by investors. We consider long-term to mean more than 5 years. For such a risk/opportunity to be material, both the probability of a detrimental/positive impact on the value of an investment and the magnitude of that impact must be non-de minimis.

We do not seek to narrowly define or limit the factor categories but rather appreciate that such analysis must necessarily take place in the context of the wider assessment of risk and reward.

It is our aim to ensure ESG factors are incorporated into the analysis process from the outset and as such it should be the responsibility of all members of the investment team to contribute to this process. All Troy's mandates are populated from a collectively created investment universe of researched stocks that analysis has shown meet our quality and risk criteria and therefore the ESG factors are equally incorporated into all of Troy's mandates.

The only vehicles to combine incorporation strategies are the Trojan Ethical Income Fund and the Trojan Ethical Fund. These funds apply a negative screen in accordance with the published ethical investment criteria in addition integrating ESG factors into at the stock specific research level.

LEI 01.3

If assets are managed using a combination of ESG incorporation strategies, briefly describe how these combinations are used. [Optional]

The only mandates to combine equity ESG incorporation strategies are the Trojan Ethical Income Fund and the Trojan Ethical Fund. These vehicle seeks to combine the analysis of ESG factors with a negative screen.

Troy maintains an investment universe of stocks that have been researched and analysed (including the integration of ESG factors) and meet Troy's stringent quality standards. All Troy's portfolios, including the screened Ethicalmandates, arepopulated from this same universe.

As a separate and subsequent step, Troy's Ethical Screening Criteria are then applied to the universe, excluding additional stocks prior to constructing Troy's ethical funds. The criteria are based on exposure to certain revenue streams including those relating to fossil fuels, armaments, alcoholic beverages, high interest rate lending, gambling, pornography and tobacco.

NB. The Trojan Ethical Fund's ethical investment criteria also addresses investment in government & public securities and precious metals.

Description

The Trojan Ethical Income Fund and Trojan Ethical Fund screen equities on the basis of a set of ethical investment criteria. Following a refinement of the criteria in July 2017 the exclusions are based on the percentage of revenue exposures to certain activities and products. In select cases in relation to particular munitions, exclusions are made in relation to breaches of certain conventions. VigeoEiris support this screening process.

- Positive/best-in-class screening
- Norms-based screening

Screened by

- UN Global Compact Principles
- The UN Guiding Principles on Business and Human Rights
- International Labour Organization Conventions
- United Nations Convention Against Corruption
- OECD Guidelines for Multinational Enterprises
- Other, specify
Conventions relating to cluster munitions and anti-personnel mines.

Description

Two convention watch screens on cluster munitions and anti-personnel mines are used to support the armaments criteria.

LEI 04.2	Describe how you notify clients and/or beneficiaries when changes are made to your screening criteria.
----------	--

The Trojan Ethical Income Fund's ethical investment criteria were established as a result of consultation with the fund's seed investor and other potential investors prior to launch. The ethical criteria have been reviewed and adjusted twice since launch in January 2016. It is anticipated that they will be reviewed on an ad hoc basis in future. However we do not anticipate further material change due to the public nature of the fund and the diverse investor base. Any changes made to the criteria will be notified to investors in accordance with the relevant regulatory requirements.

Indicate which processes your organisation uses to ensure ESG screening is based on robust analysis.

- Comprehensive ESG research is undertaken or sourced to determine companies' activities and products.
- Companies are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies.
- External research and data used to identify companies to be excluded/included is subject to internal audit by ESG/RI staff, the internal audit function or similar.
- Third-party ESG ratings are updated regularly to ensure that portfolio holdings comply with fund policies.
- Trading platforms blocking / restricting flagged securities on the black list.
- A committee, body or similar with representatives independent of the individuals who conduct company research reviews some or all screening decisions.
- A periodic review of internal research is carried out.
- Review and evaluation of external research providers.

ESG research is available to analysts in multiple forms. Troy's agreement with VigeoEiris provides ESG research coverage of some, but not all, of our holdings and ISS provides norms based research with relation to the UN Global Compact and on governance matters in relation to proxy voting research. Troy subscribes to MSCI's comprehensive ESG research product. ESG data is also accessed via Bloomberg. Troy's own internal research template has a standard section for governance risk and environmental & social risks.

Approach

- We use our own research or voting team and make voting decisions without the use of service providers.
- We hire service providers who make voting recommendations and/or provide research that we use to guide our voting decisions.

Based on

- The service-provider voting policy we sign off on
- Our own voting policy
- Our clients` requests or policies
- Other (explain)

Troy votes against management where we believe that resolutions are significantly misaligned with shareholder interests. Third party research may help inform this process.

- We hire service providers who make voting decisions on our behalf, except in some pre-defined scenarios where we review and make voting decisions.
- We hire service providers who make voting decisions on our behalf.

LEA 12.2 | Provide an overview of how you ensure that your agreed-upon voting policy is adhered to, giving details of your approach when exceptions to the policy are made.

Troy does not prescribe specific voting stances on particular issues within its policy. Instead Troy chooses to focus on particular instances where we believe resolutions are misaligned with shareholder interest.

Votes are automatically cast in-line with management as a default setting if no controversial resolution is identified either by our in-house research, by Troy's third party research provider or as a result of a previous vote against management or engagement.

A third party research provider is used to flag controversial resolutions, supply background research, and provide a voting platform. Troy's voting outcomes may vary significantly from any recommendations made by the research provider.

(C) Implementation: Integration

FI 10	Mandatory	Public	Descriptive	PRI 1
-------	-----------	--------	-------------	-------

FI 10.1	Describe your approach to integrating ESG into traditional financial analysis.
----------------	--

Troy carries out qualitative and quantitative analysis dealing with ethical concerns in relation to sovereign issuers. The analysis centres on several environmental, social and governance (ESG) issues. ESG analysis is integrated into the research process at Troy for fixed income as with equities. The objective of Troy's funds to preserve capital must take into consideration material risks for each investment case. It is within this context that we seek to address ESG factors as part of a wider set of factors that influence our decision to invest. With the launch of the Trojan Ethical Fund in March 2019, our ESG analysis of fixed income has been bolstered by third-party research. Troy's fixed income ESG analysis focuses on the issues which we believe pose the greatest risk to investors' capital. These include but are not limited to the following areas.

- The damage that ESG failings can have on a country's reputation and its ability to issue debt, with particular attention to political stability, political rights and civil liberties.
- The strength of the rule of law, particularly in relation to bribery, extortion and corruption.
- Current account and fiscal balance, debt rating and outlook
- The risk of fines or legal action relating to breaches of regulation and conventions relating to social standards of practice and discrimination.
- The risk of fines or legal action relating to breaches of regulation and conventions relating to environmental standards.
- UN and EU sanctions

FI 10.2	Describe how your ESG integration approach is adapted to each of the different types of fixed income you invest in.

We currently invest solely in US and UK government debt. If we were to invest in corporate debt, ESG analysis would centre on issues that are company-specific, following the same framework as that used for ESG equity analysis.

FI 12.2 Please provide more detail on how you review E, S and/or G factors in your integration process.

ESG research on fixed income issuers held in the funds will be updated at least quarterly. This is currently focused on sovereign debt since this is the funds' current fixed income exposure. The updates centre on changes in the sovereign's outlook, breaches of/withdrawal from conventions, changes in stance from the current government towards significant ESG factors, changes in government following a general election and changes to third-party ESG scores for that particular sovereign. Reference to new independent reports or events of significance for the relevant sovereigns will also be made.
