RI TRANSPARENCY REPORT

2020

Government Superannuation Fund Authority

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

OO 11.3b

If your organisation does not integrate ESG factors into investment decisions on your externally managed assets, explain why not.

Our investment in Commodities only consists of Futures contracts, so ESG factors are not relevant

OO 11.4

Provide a brief description of how your organisation includes responsible investment considerations in your investment manager selection, appointment and monitoring processes.

We have a section in RFI questionnaires for the managers to complete. If the manager makes the short list to be interviewed then we will discuss ESG in more detail with them.

For appointments, our investment management agreements have a section in the investment guidelines on ESG. Managers are provided with our exclusion list at appointment and whenever the list is updated.

For monitoring, we periodically send questionnaires to our managers on specific topics. In July 2019 we sent questionnaire letters to all our managers, including ones where we were invested in pooled funds, asking how they

incorporated climate change and ESG into their investment approach. Every 3 months we send our list of holdings to our Engagement provider, who uses this information to decide priorities for engagement.

On compliance, we monitor that they do not hold any of securities that are on our exclusion list. When we meet with managers, they will provide any updates on their ESG processes, or items of interest

SG 01.4

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

Our investment beliefs underpin our investment decisions. One of our investment beliefs is: "Responsible Investment encompasses not only maximising return for risk, but also acting in accordance with broadly accepted global standards of ethical conduct in relation to business governance, environmental and social risks." We interpret fiduciary duty as maximising the financial interests of scheme members and the NZ Government as guarantor of pensions. We also have a statutory duty to "avoid prejudice to NZ's reputation as a responsible member of the world community". This means portfolio optimality may be sacrificed to avoid or limit prejudicial investments. The Authority does not invest in entities acting contrary to NZ's laws or international agreements nor tobacco investments. As a member of the UNPRI we collaborate with other investors to with companies that breach our ESG standards and exclude those that do not respond adequately. Our external managers are expected to consider ESG factors when investing and comply with our policies.

Our approach to Responsible Investment (RI) is governed by our Statement of Investment Policies, Standards and Procedures (SIPSP). The SIPSP refers to ESG integration , voting , engagement and exclusions.

SG 01.5

Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

We have some pooled investments where we cannot enforce our excluded stocks but we inform the managers of our policies and exclusions and ask them to take those into consideration.

Exclusion decisions are based on a clear process and principles. International conventions, New Zealand law, Crown actions, and companies' involvement and activities, are key factors in our decision-making process.

There are two types of exclusions:

- (a) 'product' exclusions, where companies are excluded based on the products they make (for example tobacco, cluster munitions)
- (b) 'poor ESG practices' exclusions, where companies are excluded for systemic breaches of responsible investment standards.

In addition, the Fund will exclude investment in the government bonds of any nation state where there is widespread condemnation or sanctions by the international community and New Zealand has imposed meaningful diplomatic, economic or military sanctions aimed at the government.

Since the Christchurch terrorist attack in 2019, we also introduced a new category of product exclusions: companies involved in the manufacture of civilian automatic and semi-automatic firearms and magazines or parts prohibited under New Zealand law.

More information is available on NZ Super's website: <https://www.nzsuperfund.co.nz/how-we-invest-responsible-investment/exclusions>.

The passive investments use futures not individual equities.

Additional information [OPTIONAL]

We have chosen not to answer 7.2 for a number of reasons:

- Engagement is very resource intensive and can take years to yield results. Therefore monitoring the number of companies engaged is not reflective of engagement effort or quality.
- We engage via multiple avenues: directly ourselves, through an engagement service provider, through involvement with collaboration and via our managers. Looking at what our managers do in isolation misrepresents our activities.

- Outline of service provider's role in implementing your organisation's active ownership policy
- Description of considerations included in service provider selection and agreements
- Identification of key ESG frameworks which service providers must follow
- Outline of information sharing requirements of service providers
- Description of service provider monitoring processes
- Other; (specify)
- None of the above

No

LEA 01.6

Additional information [optional]

Regarding LEA 1.5 our policy does not explicitly state the options provided but our contract with our service provider covers most of the options

BMO is our engagement service provider. Their approach to engagement is based on constructive and confidential company dialogue and on building a relationship of trust, where, over time, they seek to gain a sound understanding of how companies manage the key ESG issues linked to their activities. BMO encourages improvement in ESG management should they deem existing practices insufficient to respond to ESG risks and/or opportunities.

Internal engagements:

In conjunction with NZSF, before deciding to engage, we look at fit with priorities, our capacity to contribute and engage directly with target companies; the potential effectiveness of engagement, and; resources required.

Before undertaking engagement, we put together an engagement plan that provides context and reasoning for the engagement as well as setting performance targets and milestones. Progress of the engagement is recorded and reported quarterly. Monitoring responses (or lack of) is also undertaken quarterly.

Collaborative engagements:

The collaborative engagements that we choose to join will fit with our priorities, have clear objectives and methodologies for tracking progress. We also have an internal approval process which we need to go through before joining any collaborations.

In 2019, alongside the other Crown-owned investors in New Zealand, we have led a large collaborative engagement with the social media companies in response to the livestreaming and dissemination of content relating to the Christchurch terror attack. The engagement has a sole objective with a clear engagement plan.
