RI TRANSPARENCY REPORT

2017

Carmignac Gestion

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2017 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

We also believe that through screening and best in class approach we are able to offer investment choices that satisfy a basic level of ESG criteria in responsible investing.

LEI 03.3

Where assets are managed using a combination of ESG incorporation strategies, briefly describe how these combinations are used. [Optional]

We apply a strict exclusion policy for which controversial companies and countries are pre-set into our Bloomberg AIM portfolio management system preventing trading. Our MSCI ESG Business involvement tool provides an aid to screening for other controversies. Extra financial ESG criteria are integrated during company due diligence where checklists are used to monitor the companies approach to ESG, financial projections and valuation. Most of our funds have a low exposure to fossil fuels and we have integrated a carbon emissions monitoring and reporting process in the largest funds since 2017. Furthermore, we have implemented in 2017 a full and complete responsible investment approach for our emerging funds, which is available on our website. The portfolio managers and analysts are responsible for the implementation of the ESG criteria, while Carmignac's dedicated ESG committee is responsible for the launch and implementation of new ESG initiatives, client enquiries on the company's ESG approach and track record and ESG policy adherence of our Funds. The ESG committee is composed of members of the investment committee, marketing, compliance and middle office representatives.

LEI 06.2	Describe how the screening criteria are established, how often the criteria are reviewed and how you notify clients and/or beneficiaries when changes are made.
----------	---

- Excluded companies, sectors, and countries are predefined in our order management system to prevent transactions which compose part of our filtering process.
- Analysts and portfolio managers will screen companies for controversies within ESG criteria among other financial criteria.
- The analysts and portfolio managers may use the MSCI ESG Business tool to screen for controversies within a sector or a country.

When changes to ESG procedure are undertaken, these will be communicated on our dedicated ESG internet website.

Screening criteria are automatically reviewed annually, as events occur such as lifting of sanctions for Iran, or at the request of Carmignac's ESG Committee.

Carmignac practices two levels of engagement, through its voting policy with globally renown, voting service provider ISS, and through the engagements our PMs and analysts may have during due diligences regarding E S and G issues, or as particular controversies arise.

Since 2015 with the cooperation of ISS we have raised our level of voting participation to 40%. Our Emerging markets funds target in 2017 is 80% participation rate

Regarding portfolio manager engagements, we have followed UNPRIs recommendations in 2016, by setting up a registry for written engagements so that they can be tracked and are transparent. These engagements are tagged inside our research data base called Tamale.

LEA 17.4

Provide a brief overview of your organization's approach to (proxy) voting.

By appointing an external service provider, Carmignac expects to leverage on ISS Governance expertise regarding the analysis performed on submitted resolution during corporate meetings. Moreover, Carmignac is conscious of economic, social and environmental concerns that issuers will face in the future. This is the reason why Carmignac decided to leverage on the principles set in the « sustainability » policy defined by ISS Governance.

Carmignac also exercises the voting rights attached to the securities held by the UCI it manages on behalf of unit holders and/or shareholders where there is a risk of companies changing their strategy, which may be evidenced by:

- a risk of a change in the majority shareholder;
- a risk of a merger / acquisition;
- a risk of a change in the management team;
- a risk of restructuring, etc.

It is also important to remind that one of Carmignac main objectives is to establish a sustainable relationship with company's management. As a consequence, Carmignac decides to focus on meetings, where the consolidated position of securities held by the UCI it manages on behalf of unit holders and/or shareholders can be assessed as "significant"

LEA 17.5 Provide an overview of how you ensure your voting policy is adhered to, giving details of your approach when exceptions to the policy are made (if applicable).

The voting practice articulates around 3 departments at Carmignac: The portfolio managers, Middle office and the Compliance team. However most of the administration is performed through our service provider ISS, our custodians and our middle office.

Carmignac Gestion receive the ballots for voting meetings on ProxyExchange platform from Broadridge (BP2S) or via Caceis. ISS post the appropriate analysis for the meetings which is generally available 15 days before meeting via ProxyExchange.date. Alerts are in place to be informed when there is a meeting to be voted. There is an automation of the votes on a specific list of issuers updated monthly. Carmignac Gestion has always the possibility to override the votes if they do not agree with the analysis or manually instruct any meeting or ballot on ProxyExchange. Statuses of ballots are updated with the information received from Broadridge or directly from Caceis relating to successful or unsuccessful vote processing. Shares on loan may be recalled to enable voting.

FI 04.2 Describe your reasons for choosing a particular ESG incorporation strategy and how combinations of strategies are used.

For supranationals and sovereigns, we apply a top down macroeconomic approach to country selection excluding those countries where we deem Governance, Social and Environmental factors are detrimental and represent a systemic risk to our portfolios.

Our corporate credit portfolios are subject to the same exclusions as the equity portfolios.

As is the practice of best in class for issuer selection.

FI 07.2	Describe your approach to screening for internally managed active fixed income
----------------	--

The investment management team does incorporate a certain number of ESG filters, policies and reporting in the investment process. Carmignac Gestion has engaged a specialized ESG consultant, MSCI ESG Research to offer the capacity for pre-screening of companies for ESG controversies even prior to our analysts and Portfolio Managers company research meetings. This service also includes a annual ESG analytical assessment of 4 fixed income funds which is an increase from last year. As MSCI ESG broadens their reach we are now able to compare our Emerging markets bonds funds to ESG benchmarks. Other than the MCSI ESG tools and analytics, the portfolio managers and analysts complete a checklist for each investment case which includes fields for comment on E, S and G issues if they are relevant. Best-in-class approach is part of the process of stock selection which can include a possible exclusion should the company contravene what we see as responsible policies regarding the environment, their governance or social issues for employees or clients. Carmignac respects a list of exclusions (companies involved in controversial weapons as anti-personnel mines and cluster bombs). We also have an internal management system that prevents investments in certain countries such as Sudan.

FI 14.1 Describe your approach to integrating ESG into traditional financial analysis.

Our approach to integrating ESG into financial analysis encompasses both top down macroeconomic and best-in-class approaches. Best in class approach is part of the process of security selection which can include a possible exclusion should the company contravene what we see as responsible policies regarding the environment, their governance or social issues for employees or clients.

FI 14.2 Describe how your ESG integration approach is adapted to each of the different types of fixed income you invest in.
