RI TRANSPARENCY REPORT

2018

Norron Asset Management

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2018 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

SG 01.4	Describe your organisation's investment principles and overall investment strategy, and how they consider ESG factors and real economy impact.
----------------	--

The increasing awareness globally around imbalances and differences existing in society generally as well as the business world is an important secular development that Norron considers very important and complies with when it comes to the firm's investment process. Increased awareness from the world around us and greater expectations from stakeholders call for companies to focus more on sustainability and doing so soundly and efficiently. The long-term effects on the capital markets when a collective megatrend develops are most likely that the companies that act sustainably and follow the set international conventions will obtain a premium rating/valuation and probably also a lower levels of long-term cost of capital.

We believe that through an active approach towards sustainability we can live up to our stakeholders' high demands when it comes to both a long-term risk-adjusted return and a positive sustainable development for the companies we invest in, which in turn impacts the world we all live in, now and in the future.
