

# CLIMATE TRANSPARENCY REPORT 2020

Global Evolution

# About the Climate-related Disclosure Indicators

Climate has been identified as a top priority for PRI signatories, with over 70% of asset owners reporting this as the most important long-term trend they are acting on.

The FSB Task Force's guidance on climate-related financial disclosure aim to create a single framework for disclosure on assessment and management of climate-related risk. The recommendations, supported by investors representing US\$22 trillion, identify four main disclosures, Governance, Strategy, Risk Management, Metrics and Targets, and include specific guidance for asset owners and managers.

As a result, the PRI introduced climate-related disclosure indicators that can be used to align with the TCFD recommendations in the 2020 PRI Reporting Framework.

## About this report

This report is an export of only the climate-related indicators from the 2020 Reporting Framework response. The full Public Transparency Report is available here (<https://reporting.unpri.org/surveys/PRI-reporting-framework-2020/-511B8DC0-634B-4D1B-BC75-11A41FF714AD/79894dbc337a40828d895f9402aa63de/html/2/?lang=en&a=1>). It shows the responses to all the completed climate indicators, even those you chose to keep private. It is designed for your internal review or – if you wish - to share with your stakeholders.

The PRI will not publish this report on its website if you have designated your 2020 climate reporting as “private”. Otherwise, you will be able to access the Climate Transparency Report of your organisation and that of other signatories on the [PRI website](#) and on the [Data Portal](#).

To easily locate information, there is a **Recommendation index** which summarises the indicators that signatories complete and disclose. The report presents information exactly as it was reported as per signatory preference. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory are presented in this report.

**SG 01.1** Indicate if you have an investment policy that covers your responsible investment approach.

SG 01 CC	Mandatory to Report Voluntary to Disclose	Public	Descriptive	General
----------	---	--------	-------------	---------

**SG 01.6 CC** Indicate whether your organisation has identified transition and physical climate-related risks and opportunities and factored this into the investment strategies and products, within the organisation's investment time horizon.

Yes

Describe the identified transition and physical climate-related risks and opportunities and how they have been factored into the investment strategies/products.

Climate risk such as co2 emission, droughts, natural disasters, etc. are identified through data monitoring and analysis, and through such data directly integrated into valuation model approaches as part of positive screening. That informs directly our investment strategies and process

No

**SG 01.7 CC** Indicate whether the organisation has assessed the likelihood and impact of these climate risks?

Yes

Describe the associated timescales linked to these risks and opportunities.

The timescales vary across type of indicator for climate risk; some take place gradually and slow (like co2 emission) while others take place quickly and almost without warning (like natural disasters). Through our quantitative valuation approach the implicitly estimates the coefficients and likelihoods of events appearing.

No

**SG 01.8 CC** Indicate whether the organisation publicly supports the TCFD?

Yes

No

**SG 01.9 CC** Indicate whether there is an organisation-wide strategy in place to identify and manage material climate-related risks and opportunities.

Yes

Describe

Our dual objectives of sustainability improvements and return generation for our clients are integrated under the umbrella of the following nine pillars:

**Philosophy** Our philosophy and corporate values as a company rely on supporting progress towards sustainable growth and development in the countries in which we invest. In practice, this is accomplished by directly integrating sustainability into our investment decisions.

**Vision** Our vision is a world free of poverty driven by institutions, countries and companies.

**Mission** Our mission is to promote sustainable development in emerging market countries and companies around the world through our investments

**Approach** Our approach is to integrate sustainability indicators directly into our valuation assessments that directly and systematically inform investment decision-making

**Framework** Our proprietary approach leans on a unified framework articulated by the United Nation with the formulation of the Sustainable Development Goals.

**Engagement** Our engagement with governments and companies is conducted directly and indirectly and is an important avenue to influence decision-making at the issuer level to promote sustainable development.

**Support** Our support goes to a variety of initiatives and principles to promote such as the UN Principles of Responsible Investment, the UN Global Compact and similar initiatives with the purpose of standing by the thought-leadership that such initiatives represent.

**Process** Our Sustainability Process lays out the technical details of this Sustainability Policy[1] by describing in detail the definitions and indicators among other relevant process-oriented items.

**Pledge** Our pledge to our clients, colleagues, community, society, and the world is to diligently and analytically and with passion to direct our assets under management in a direction that supports and promotes sustainable development to the best of our ability.

These nine pillars are the cornerstones of our Sustainability Policy for our company.
