RI TRANSPARENCY REPORT

2017

Longfellow Investment Management Co., LLC

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2017 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

SG 03.1 Indicate if your organisation has a policy on managing potential conflicts of interest in the investment process.

Yes

SG 03.2 Describe your policy on managing potential conflicts of interest in the investment process.

Employees are bound by the firm's Code of Ethics. This includes duty to client, personal trading, and guidelines for honest and ethical conduct to avoid conflicts of interest. On an annual basis, each employee must review and sign their commitment to abide by the Code. Along with the Code of Ethics, LIM's trading policies are also designed to ensure fair treatment of all clients through the allocation of securities.

LIM's only source of revenue is investment management fees. Employees receive no performance incentives. All employee compensation is driven by the success of the firm, which is directly a result of the overall success and satisfaction of our clients.

SG 07.2

For the roles for which you have RI oversight/accountability or implementation responsibilities, indicate how you execute these responsibilities.

The lead members of the investment team are responsible for setting policies and guidelines to implement our ESG analysis. This includes key characteristics to evaluate and capture/document as well as the proper weighting of ESG indicators for each sector and security. Analysts take these policies and implement them into the security level research. It is the responsibility of portfolio managers to ensure that investment staff are properly trained. Each member of the investment team must understand the risk-focus that drives our ESG emphasis. Tools and processes continue to be developed and enhanced in order to evaluate analysis, scoring and effectiveness. As a fixed income manager, we believe this risk evaluation can add value to our clients.
