RI TRANSPARENCY REPORT

2020

Sionna Investment Managers

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

Sionna's objective is to provide downside protection and deliver long-term, above-average returns by applying a disciplined value approach. ESG factors contribute to our fundamental research and help to inform our analysis as part of our bottom-up investment approach. A proper evaluation of a company's exposure to ESG factors helps Sionna to determine what long-term returns to anticipate from a company, what level of risk to account for and what margin of safety to demand on our investment. By understanding the key drivers of a business and what obstacles may challenge our investment thesis, we can properly manage risk and remain good stewards of our clients' capital.

LEI 01.2

Describe your organisation's approach to ESG incorporation and the reasons for choosing the particular strategy/strategies.

As part of our in-depth research process, we use a robust Research Questionnaire to help us analyze various aspects of a company. Sionna has integrated environmental, social and governance questions into the Questionnaire - formalizing our process to ensure that any potential issues are raised and addressed during our fundamental research and analysis.

We strive to invest in companies that are positioning their businesses to prosper over the long term. Such quality businesses aim to limit environmental and social issues, as these concerns have been growing increasingly impactful over time. We question management teams regarding these issues and believe that astute management teams have a good understanding of ESG implications on their businesses.

Analyzing a company's governance practices is a critical component of our research process. We consider board composition, historical track record, and best practices to determine if a company follows strong governance. We have a preference for directors and management teams that are aligned with shareholders.
