About the Climate-related Disclosure Indicators

Climate has been identified as a top priority for PRI signatories, with over 70% of asset owners reporting this as the most important long-term trend they are acting on.

The FSB Task Force’s guidance on climate-related financial disclosure aim to create a single framework for disclosure on assessment and management of climate-related risk. The recommendations, supported by investors representing US$22 trillion, identify four main disclosures, Governance, Strategy, Risk Management, Metrics and Targets, and include specific guidance for asset owners and managers.

As a result, the PRI introduced climate-related disclosure indicators that can be used to align with the TCFD recommendations in the 2020 PRI Reporting Framework.

About this report

This report is an export of only the climate-related indicators from the 2020 Reporting Framework response. The full Public Transparency Report is available here (https://reporting.unpri.org/surveys/PRI-reporting-framework-2020/5E519BB0-4D31-4783-A3C2-DAC2DEF4F419/79894dbc337a40828d895f9402aa63de/html?lang=en&a=1). It shows the responses to all the completed climate indicators, even those you chose to keep private. It is designed for your internal review or – if you wish - to share with your stakeholders.

The PRI will not publish this report on its website if you have designated your 2020 climate reporting as “private”. Otherwise, you will be able to access the Climate Transparency Report of your organisation and that of other signatories on the PRI website and on the Data Portal.

To easily locate information, there is a Recommendation index which summarises the indicators that signatories complete and disclose. The report presents information exactly as it was reported as per signatory preference. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory are presented in this report.

### Symbol and Status

- ✓ The signatory has completed this sub-indicator
- - The signatory did not complete this sub-indicator.
- This indicator is relevant to the named TCFD recommendation

Within the first column "Indicator", indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.
ORGANISATIONAL OVERVIEW

This section provides an overview of your organisation. These characteristics are used to define your peer groups.

| SG 01.6 CC | Indicate whether your organisation has identified transition and physical climate-related risks and opportunities and factored this into the investment strategies and products, within the organisation’s investment time horizon. |

- **Yes**
  - Describe the identified transition and physical climate-related risks and opportunities and how they have been factored into the investment strategies/products.
  
  Physical and transitory climate-related risks are currently assessed for all of our asset classes on the basis of internal workshops with following departments: Risk-Management, Portfolio Management, Asset-Management, sustainability department. We see climate-related risks as factors influencing (financial) risks that have already been taken into account. Our goal is to expand our risk-due diligence and to integrate climate-related risk into our standard risk reporting.

- **No**

| SG 01.7 CC | Indicate whether the organisation has assessed the likelihood and impact of these climate risks? |

- **Yes**
  - Describe the associated timescales linked to these risks and opportunities.
  
  We are currently assessing the potential risks in each asset class. Likelihood and impact are part of this assessment. The assessment will be finished by end of 2020.

- **No**

| SG 01.8 CC | Indicate whether the organisation publicly supports the TCFD? |

- **Yes**
- **No**
Explain the rationale

We are currently working on elements that will help us to publish a TCFD report in the medium term. Public support would be sought after finishing a TCFD report.

<table>
