RI TRANSPARENCY REPORT

2020

DNR Capital

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

SG 01.4

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

DNR Capital believes a focus on quality businesses will enhance returns when it is combined with a thorough valuation overlay. We seek to identify quality businesses that are mispriced by overlaying our quality filter referred to as our 'quality web', with a strong valuation discipline.

We define quality businesses as being those with the following five attributes:

1. earnings strength (particularly improving return);
2. superior industry position;
3. a sound balance sheet;
4. strong management; and
5. low environmental, social and governance (ESG) risk.

We are seeking to identify securities which score poorly from an ESG perspective which could raise a risk not considered by the broader market. We utilise specialist ESG data from Sustainalytics and our own procedures designed for our Australian Equities Socially Responsible Portfolio. We score each business based on ESG characteristics and can do a deep dive where a business scores poorly on any issue. Key regard is made to tail risks that could impact valuation.

Yes

SG 03.2	Describe your policy on managing potential conflicts of interest in the investment process.
---------	---

A conflict of interest is where the interests of a client are irreconcilable with, or diverge from, some or all of our interests or our reputation and include actual, apparent and potential conflicts. DNR Capital's conflicts management obligation promotes the following outcomes:

- ensuring we always act in the best interests of clients, and where there is a conflict, prioritise each client's interests above our own
- confident and informed decision making by consumers
- fairness, honesty and professionalism by those who provide financial services
- fair, orderly and transparent markets for financial products
- ensuring the company has identified and continues to identify its actual and potential conflicts of interest
- ensuring the company has arrangements in place to mitigate the impact that conflicts of interest may have on its continued operation
- a culture of compliance.

We identify interests which have the potential for a conflict and manage them by:

- following internal procedures and notifying the policy owner as soon as practicable of any actual or potential conflicts of interest, and
- after evaluating the conflict deciding upon and implementing an appropriate response to the conflict of interest which may include controlling, disclosing or avoiding the conflict.

DNR Capital has promoted responsible investment and been active in improving the investment approach by integrating climate change risk into the DNR investment process.

Description

DNR Capital is committed to effectively managing Environment, Social and Governance (ESG) issues such that risks and opportunities are identified and properly assessed. DNR Capital has adopted a formal ESG Policy which sets out the key ESG factors considered during the wider investment screening, decision making and portfolio construction process. This includes a section on 'Climate Change':

DNR Capital takes climate risk into account when undertaking investment analysis to identify risks that may impact future financial performance. It should be noted that decisions about whether to buy, hold or sell investments are based primarily on traditional financial analysis, however DNR Capital has access to climate-related data through external service providers and focuses on a business's disclosures around:

- Governance
- Strategy
- Risk Management, and
- Metric and Targets.

LEI 01.2

Describe your organisation's approach to ESG incorporation and the reasons for choosing the particular strategy/strategies.

For our Socially Responsible portfolio, we apply a screening and integration process over 3 stages:

1. Our best stock ideas are screened against four primary metrics:

- Must not be involved in the production, distribution and sale of pornography as part of the core business.
- Must not be involved in owning or operating a gaming related business, or manufacture and supply of gaming equipment and systems as part of the core business.
- Must not be involved in the supply and distribution of weapons components as part of the core business.
- Must not be involved in the manufacture and distribution of tobacco-related products as part of the core business.

In addition to the above, we also cater to clients demands for the screening out of Fossil Fuels, Animal Testing or Cruelty, Obesity and other ESG issues.

2. The companies that we are seeking to add, or that we currently hold, are then subject to an internal ESG Research framework, which grades each stock on a 5-point scale.

The analysis is performed by the analyst that covers the company in question, where they source information from company disclosures, an internal ESG resource, broker research and Sustainalytics research.

The framework takes in to consideration many factors including:

Environmental:

- Environmental impact of operations
- Exposure to cost of pollutants
- Investment in environmental efficiencies
- Environmental management frameworks
- Environmental incidents and controversies
- Waste and hazardous materials processing
- Supply chain sustainability
- Climate change Awareness and preparedness

Social:

- Social incidents and controversies
- Human capital management
- Operational health and safety
- Supply chain ethics
- Code of conduct enforceability
- Product incidents and controversies
- Data privacy incidents and controversies

Governance:

- Business structure and activity alignment
- Company culture
- Board characteristics
- Equity ownership
- Remuneration and incentives
- Capital management
- Stewardship of the business
- Risk and control framework
- Shareholder communication
- Governance incidents and controversies

In addition to the scoring framework, we also consider additional merit to companies that are involved in socially responsible activities such as:

- Renewable resources
- Waste management
- Healthcare
- Public transport
- Social infrastructure
- IT solutions
- Environmental technologies and solutions
- Education
- Compliance

3. Once a company has been scored by the analyst, the research is put to the Socially Responsible Committee on a monthly basis, where the analyst is asked to present their case, with reports from brokers and Sustainalytics provided for context and comparison. In addition to its function of approving changes to the portfolio from an ESG perspective, the Committee also:

- Reviews the portfolio's ESG metrics
- Reviews the ESG metrics of the individual companies in the portfolio
- Discusses ESG thematic presented by the ESG analyst and how they could impact the portfolio or prospective additions to the portfolio
- Discusses engagements that have occurred during the month and engagements that should be organised for the month ahead given the content of the meeting.

We believe that this process succeeds in three key areas:

1. We eliminate securities that have structural ESG headwinds as a result of their core business activities.
2. We ensure that each analyst is considering a wide range of ESG issues when modelling their business and establishing their thesis.
3. We maintain oversight of the process and ensure that there is sufficient rigour around the ESG quality of the portfolio.

(A) Implementation: Screening

LEI 04	Mandatory	Public	Descriptive	PRI 1

----------	--

Type of screening

Negative/exclusionary screening

Screened by

- Product
- Activity
- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

	Description
--	-------------

DNR Capital's Socially Responsible portfolio avoids investment in companies that are judged to have a direct involvement in pornography, gambling, armaments, tobacco, alcohol and obesity. We form a judgment as to whether or not the activity in question forms a direct or core part of the business. By "direct" or "core" we mean that the company is involved in the manufacture, supply or distribution of the product or the provision of the service. We also extend this to other areas including Fossil Fuels at the client's request.

- Positive/best-in-class screening
- Norms-based screening

LEI 04.2	Describe how you notify clients and/or beneficiaries when changes are made to your screening criteria.
----------	--

The screening criteria is subject to annual formal reviews but from time to time we will re-evaluate the criteria if there is confusion as to whether a company falls into the Direct or Indirect categories. Those categories are relevant to the screening of:

- PornographyDirect - Production, distribution and sale of pornography as a core business
-
- GamingDirect - Core business of owning or operating a gaming related business or manufacture and supply of gaming equipment and systems.
-
- ArmamentsDirect - Supply and distribution of weapons components to Defence Forces or any other business/individual.
-
- TobaccoDirect - Manufacture and distribution of tobacco-related products.
-

Our ESG policy is available publicly on our website.
