RI TRANSPARENCY REPORT

2019

Genstar Capital

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2019 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Genstar focuses on making control investments in North American middle-market businesses in Genstar's four core industry verticals of Financial Services, Software, Industrial Technology, and Healthcare (the "Core Verticals"). Specifically, Genstar targets businesses that have the potential to be transformed into industry leaders through a rigorous focus on human capital and strategic business improvement.

Genstar investigates relevant, applicable ESG issues as part of the due diligence process for each portfolio company acquisition, with the goals being to mitigate any material investment risk while enhancing investment return wherever possible. At the conclusion of the due diligence process, any material findings are incorporated as part of the final reporting by our deal professionals to the Investment Committee. Further, we enhanced our ESG program by developing a formal ongoing management and monitoring program to mitigate ESG risks and invest in ESG opportunities throughout our ownership period. We follow up on risks identified in diligence, noting where progress has been made and where there are opportunities for further improvement. We perform this monitoring process on an annual basis as well as at exit to measure the full impact of our ESG monitoring over the hold period.

Genstar's responsible investment program was initially rolled-out with our formal Environmental, Social, Governance (ESG) policy in 2015. Our program has traditionally focused on identifying ESG risks and opportunities in the diligence process. ESG issues that are particularly relevant across our portfolio include data privacy and security, ethics and compliance, diversity and equal employment opportunity, and anti-bribery and corruption. Genstar's ESG program and policy is monitored by our ESG Committee, whose members include Ryan Clark, President & Managing Director, Tony Salewski, Managing Director, and Melissa Dickerson, Managing Director, Operations. Melissa also serves as Genstar's ESG Officer, monitoring the day-to-day ESG program and leading the firm's ESG initiatives.

Genstar's ESG Committee meets on an annual basis to review the ESG and responsible investment policies in place. In addition, the ESG Committee reviews the effectiveness of initial due diligence and ongoing portfolio company monitoring with the goal of improving these functions as well as updates in the responsible investment community and among peers.
