RI TRANSPARENCY REPORT

2018

Helsinki Capital Partners Ltd

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2018 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

SG 01.4	Describe your organisation's investment principles and overall investment strategy, and how they consider ESG factors and real economy impact.
----------------	--

We separate impact investment and sustainability themed investment as two different categories as they offer different point of views. HCP is currently using negative screening in two out of three of its portfolios.

HCP Focus uses negative screening and completely avoids certain industries. Based on the definitions above, HCP Focus can be seen as 100% responsibly invested. Investments are not made in products or services that have a clear and substantial addictive and/or destructive potential, products the manufacturing of which require vast and unnecessary human or animal suffering, and products with no other discernible purpose but killing human beings (e.g. arms).

HCP Black uses partially negative and partially positive screening. For example, investments are made in natural disaster insurances, which are defined as positive impact investments.

HCP Quant does not currently use any of the SRI strategies mentioned above since there is not enough data available for the companies HCP Quant invests in. Even smaller companies would need to start reporting on their sustainability in order for HCP Quant to successfully screen the investments.

Description

HCP Focus fund uses these.

- Positive/best-in-class screening
- Norms-based screening

LEI 04.2 Describe how the screening criteria are established, how often the criteria are reviewed and how you notify clients and/or beneficiaries when changes are made.

Screening is done on an annually basis and it is incorporated in the equity analyses by portfolio manager.

LEI 05.1

Indicate which processes your organisation uses to ensure screening is based on robust analysis.

- Comprehensive ESG research is undertaken or sourced to determine companies' activities and products.
- Companies are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies
- External research and data used to identify companies to be excluded/included is subject to internal audit by ESG/RI staff, the internal audit function or similar
- Third-party ESG ratings are updated regularly to ensure that portfolio holdings comply with fund policies.
- A committee or body with representatives independent of the individuals who conduct company research reviews some or all screening decisions
- A periodic review of the quality of the research undertaken or provided is carried out
- Review and evaluation of external research providers
- Other, specify
- None of the above

LEI 05.2

Indicate the proportion of your actively managed listed equity portfolio that is subject to comprehensive ESG research as part your ESG screening strategy.

- <10%
- 10-50%
- 51-90%
- >90%
