# RI TRANSPARENCY REPORT

## 2020

### MONETA ASSET MANAGEMENT

## About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

## Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Stock picking consists of selecting stocks according to their own characteristics and not their membership of a sector or an index. Our investment process is rigorous and based on in-depth and autonomous financial research. This enables us to think independently, remain realistic and have varied investment ideas adapted to market conditions. Our range of equity funds is deliberately narrow and all of our funds have a single objective: performance. We are equity markets specialists and this is where we focus.

Our approach is based on fundamental analysis and is divided into 3 steps: UNDERSTANDING THROUGH FINANCIAL ANALYSIS, USING OUR JUDGEMENT TO VALUE COMPANIES, ACT ACCORDING TO OUR CONVICTIONS.

Our approach also take care of 3 significant themes: Corporate Governance, Sustainable Development and Social Action. All these themes are described on our website.

LEI 01.2	Describe your organisation's approach to ESG incorporation and the reasons for choosing the particular strategy/strategies.
----------	---

Within the framework of the French energy transition law and the regulatory obligation to publish an energy transition report reviewing our practices and the carbon footprint of our funds, we have carefully studied the subject of different measures and different approaches to sustainable development in portfolio construction. This work confirmed a number of intuitions that we had:

- Sectoral bias and exclusion short cut: highly carbon-intensive sectors such as Materials can be excluded from a portfolio to improve its carbon footprint, however this is too simplistic a short cut because these sectors remain necessary for the economy... and to other sectors with a better carbon footprint.
- The trap of a fixed image: businesses change and it may be preferable to value companies going in the right direction. The notion of trajectory is therefore key in our view.
- Disparate data quality: the quality of transparency and reliability of data published by companies remains uneven at present. Basing a portfolio construction on only quantified data and on "checked boxes" is therefore a pitfall for us to avoid.

As a result, none of our funds takes environmental, social and governance criteria into account in their investment policies in a systematic and binding manner. We wish to continue to choose investments on a case-by-case basis on their financial merits, with a strong desire to take part in financing innovative projects

committed to sustainable development. The idea is not to pursue an exclusion policy or sectoral allocation determined by the various SRI labels.

We strongly prefer to develop a thoughtful approach:

From these findings and our desire to remain stock-pickers, the concept of 'innovative share' was born. We will aim to prioritise investments in companies that have the following attributes:

- companies with highly innovative technology
- suppliers of innovation technology or energy services
- companies directly involved in the energy transition
- companies with a positive societal impact

Our ambition is therefore to increase this innovative share in our portfolios by studying more and more companies that could qualify in this group.

## (A) Implementation: Screening

LEI 04	Mandatory	Public	Descriptive	PRI 1
--------	-----------	--------	-------------	-------

### LEI 04.1

Indicate and describe the type of screening you apply to your internally managed active listed equities.

#### Type of screening

- Negative/exclusionary screening

#### Screened by

- Product
- Activity
- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

#### Description

We screen ESG score of all issuers of our investments.

- Positive/best-in-class screening
- Norms-based screening

### LEI 04.2

Describe how you notify clients and/or beneficiaries when changes are made to your screening criteria.

Our methodology and results of our portfolio ESG score are annually updated in our TEE report (available on our website).

LEI 05	Mandatory	Public	Core Assessed	PRI 1
--------	-----------	--------	---------------	-------

**LEI 05.1**

Indicate which processes your organisation uses to ensure ESG screening is based on robust analysis.

- Comprehensive ESG research is undertaken or sourced to determine companies' activities and products.
- Companies are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies.
- External research and data used to identify companies to be excluded/included is subject to internal audit by ESG/RI staff, the internal audit function or similar.
- Third-party ESG ratings are updated regularly to ensure that portfolio holdings comply with fund policies.
- Trading platforms blocking / restricting flagged securities on the black list.
- A committee, body or similar with representatives independent of the individuals who conduct company research reviews some or all screening decisions.
- A periodic review of internal research is carried out.
- Review and evaluation of external research providers.
- Other; specify
- None of the above
