

CLIMATE TRANSPARENCY REPORT 2020

Perennial Value Management Limited

About the Climate-related Disclosure Indicators

Climate has been identified as a top priority for PRI signatories, with over 70% of asset owners reporting this as the most important long-term trend they are acting on.

The FSB Task Force's guidance on climate-related financial disclosure aim to create a single framework for disclosure on assessment and management of climate-related risk. The recommendations, supported by investors representing US\$22 trillion, identify four main disclosures, Governance, Strategy, Risk Management, Metrics and Targets, and include specific guidance for asset owners and managers.

As a result, the PRI introduced climate-related disclosure indicators that can be used to align with the TCFD recommendations in the 2020 PRI Reporting Framework.

About this report

This report is an export of only the climate-related indicators from the 2020 Reporting Framework response. The full Public Transparency Report is available here (<https://reporting.unpri.org/surveys/PRI-reporting-framework-2020-03E6431B-DBC2-4C36-A28C-641E4D5B0311/79894dbc337a40828d895f9402aa63de/html/2/?lang=en&a=1>). It shows the responses to all the completed climate indicators, even those you chose to keep private. It is designed for your internal review or – if you wish - to share with your stakeholders.

The PRI will not publish this report on its website if you have designated your 2020 climate reporting as “private”. Otherwise, you will be able to access the Climate Transparency Report of your organisation and that of other signatories on the [PRI website](#) and on the [Data Portal](#).

To easily locate information, there is a **Recommendation index** which summarises the indicators that signatories complete and disclose. The report presents information exactly as it was reported as per signatory preference. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory are presented in this report.

TCFD Recommendations Index

Strategy and Governance - CC			TCFD Recommendation

Investment policy

SG 01	Mandatory	Public	Core Assessed	General
-------	-----------	--------	---------------	---------

New selection options have been added to this indicator. Please review your prefilled responses carefully.

SG 01.1 Indicate if you have an investment policy that covers your responsible investment approach.

Governance and human resources

SG 07 CC	Mandatory to Report Voluntary to Disclose	Public	Descriptive	General
----------	---	--------	-------------	---------

SG 07.5 CC Indicate the roles in the organisation that have oversight, accountability and/or management responsibilities for climate-related issues.

Board members or trustees

- Oversight/accountability for climate-related issues
- Assessment and management of climate-related issues
- No responsibility for climate-related issues

Chief Executive Officer (CEO), Chief Investment Officer (CIO), Chief Risk Officer (CRO), Investment Committee

- Oversight/accountability for climate-related issues
- Assessment and management of climate-related issues
- No responsibility for climate-related issues

Portfolio managers

- Oversight/accountability for climate-related issues
- Assessment and management of climate-related issues
- No responsibility for climate-related issues

Investment analysts

- Oversight/accountability for climate-related issues
- Assessment and management of climate-related issues
- No responsibility for climate-related issues

Dedicated responsible investment staff

- Oversight/accountability for climate-related issues
- Assessment and management of climate-related issues
- No responsibility for climate-related issues

SG 07.6 For board-level roles that have climate-related issue oversight/accountability or
CC implementation responsibilities, indicate how these responsibilities are executed.

The Board has environmental related risks in the company risk register which will be considered as part of Perennial's risk management process going forward and is reviewed periodically.

We have a number of other processes in place to support Perennial's consideration of climate related risks including:

- Perennial Responsible Investment Working Group - Perennial staff have formed an internal committee in which staff decide and implement corporate ESG initiatives, including but not limited to environmental concerns.
- The board and investment team have approved the Perennial Responsible Investment Policy which states: "We acknowledge that climate change is potentially a significant risk to the planet and the global economy. Accordingly, it is likely that significant parts of the international community will seek to move towards a lower-carbon economy over time for the benefit and sustainability of the planet, society and the economy. This transition will have impacts on our investments and we will seek to understand and engage with companies on the impacts of both climate change and a move towards a lower-carbon economy on their businesses."
- Establishment of the Sustainable Future strategies which consider ESG as part of the investment strategy. One of the investment themes of the portfolio is the environment. We seek companies that provide solutions and technologies for water management and supply, renewable energy, low carbon technologies, waste management and recycling, biomaterials and environmental services.
- The hire of a dedicated ESG analyst in 2019.
- Creation and maintenance of an ESG database for over 400 stocks and development of the ESG&E Score system. The ESG&E score is a proprietary scoring system set up and run in-house by the Perennial sustainability team with input and insight from the sector analysts. The scoring mechanism is an absolute score out of 10, each for environment, social and governance performance as well as engagement. E,S&G scores are each weighted 20%, while engagement is weighted 40%. This provides a total ESG&E score which is then compared to the benchmark. Our Sustainable Future Trust must have an ESG&E score that is better than the benchmark.

ESG issues in asset allocation

SG 13	Mandatory	Public	Descriptive	PRI 1
-------	-----------	--------	-------------	-------

SG 13.1 Indicate whether the organisation carries out scenario analysis and/or modelling, and if it does, provide a description of the scenario analysis (by asset class, sector, strategic asset allocation, etc.).

- Yes, in order to assess future ESG factors
- Yes, in order to assess future climate-related risks and opportunities

Describe

We recently undertook a high level scenario analysis of one of our main funds using Citi research estimates and IEA's energy price assumptions at a 2 degree scenario. In 2020, we hope to do this across

- all portfolios and increase the depth of the range of scenarios considered.
- No, our organisation does not currently carry out scenario analysis and/or modelling

SG 13.2 Indicate if your organisation considers ESG issues in strategic asset allocation and/or allocation of assets between sectors or geographic markets.

We do the following

- Allocation between asset classes
- Determining fixed income duration
- Allocation of assets between geographic markets
- Sector weightings
- Other, specify
- We do not consider ESG issues in strategic asset allocation

SG 14	Mandatory to Report Voluntary to Disclose	Public	Additional Assessed	PRI 1
--------------	--	---------------	----------------------------	--------------

SG 14.1 Some investment risks and opportunities arise as a result of long term trends. Indicate which of the following are considered.

- Changing demographics
- Climate change
- Resource scarcity
- Technological developments
- Other, specify(1)
- Other, specify(2)
- None of the above

SG 14.2 Indicate which of the following activities you have undertaken to respond to climate change risk and opportunity

- Established a climate change sensitive or climate change integrated asset allocation strategy
- Targeted low carbon or climate resilient investments

Specify the AUM invested in low carbon and climate resilient portfolios, funds, strategies or asset classes.

	trillions	billions	millions	thousands	hundreds
Total AUM			3	000	000
Currency	AUD				
Assets in USD			2	032	199

Specify the framework or taxonomy used.

This is part of our Sustainable Future Strategies which negatively screen for a number of factors including fossil fuels and invest in companies making a positive contribution to a sustainable future, including companies that are primarily focused on the generation of renewable energy.

- Phase out your investments in your fossil fuel holdings
- Reduced portfolio exposure to emissions intensive or fossil fuel holdings
- Used emissions data or analysis to inform investment decision making
- Sought climate change integration by companies
- Sought climate supportive policy from governments
- Other, specify
- None of the above

SG 14.3

Indicate which of the following tools the organisation uses to manage climate-related risks and opportunities.

- Scenario analysis
- Disclosures on emissions risks to clients/trustees/management/beneficiaries
- Climate-related targets
- Encouraging internal and/or external portfolio managers to monitor emissions risks
- Emissions-risk monitoring and reporting are formalised into contracts when appointing managers
- Weighted average carbon intensity
- Carbon footprint (scope 1 and 2)
- Portfolio carbon footprint
- Total carbon emissions
- Carbon intensity
- Exposure to carbon-related assets
- Other emissions metrics
- Other, specify
- None of the above
