RI TRANSPARENCY REPORT

2020

BancoPosta Fondi SGR

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Communication with stakeholders about both direct and indirect impacts is core to the RI strategy. The RI policy provides with guidelines for managing investment to be applied to the specific circumstances. BancoPosta Fondi SGR informs external managers about its RI policy though they may opt for defining and applying their own. The RI policy includes exclusion criteria and entails ESG assessments of the issuers regardless of whether they are corporate or governmental. BancoPosta Fondi SGR's Committee regularly monitors the evolution of portfolio companies' ESG profile during the holding period: to this end, externally provided informations are processed and engagement activities with portfolio companies are carried out. The RI policy is made up by detailed guidelines for voting and engagement practices that allow the Company to encourage ESG considerations across portfolio companies. For companies operating in sensitive industries, the RI policy details investment criteria. Progresses on the integration of the RI policy are reported at least annually and disclosed publicly.

FI 01.2 Describe your reasons for choosing a particular ESG incorporation strategy and how combinations of strategies are used.

BancoPosta Fondi SGR establishes practical guidelines for the screening strategy. Despite that, monitoring on ESG score is regularly carried out for both single portfolio company and portfolio-wide analysis. The former allows to evaluate the ESG profile of an issuer, while the latter to factor specific ESG considerations in investment decisions. The current exclusion criteria apply both for SSA and Corporate Non-financial investments, but not for the Corporate Financial ones. The integration strategy is used alike for all fixed income investments as the issuer's ESG profile is evaluated and then regularly verified and monitored.

BancoPosta Fondi SGR's ESG integration approach is slightly adjusted according to the fixed income SSA asset types.

Corporate (financial)

BancoPosta Fondi SGR's ESG integration approach for corporate financial investments follows the general guidelines of its RI policy, that is about updating, verifying and in-depth analysis (if needed) of issuers' ESG profile.
