RI TRANSPARENCY REPORT

2018

Bankhaus Schelhammer & Schattera AG

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2018 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

LEI 01.2	Describe your organisation's approach to incorporation and the reasons for choosing the particular ESG incorporation strategy/strategies.
-----------------	---

Main Strategies:

- very strict **Exclusion Criteria**s with little interpretation room
- Best-In-Class

The combination of both strategies results in a small but powerful investment universe. We are confident to have excluded most questionable companies and sovereigns. There are plans in work to tighten the investment universe further in 2018.

Furthermore ESG-Rating is weighted based on the sector. "Renewable Energy" companies rating depend on a high environmental component whereas "Health Care" companies depend on a high social component i.e.

Responsible for the implementation is the "Sustainable Investments" team which cooperates closely with the portfolio management.

LEA 01.4 Provide a brief overview of your organization's approach to engagement

Our engagement strategy is based on 3 pillars. First of all, we as Bankhaus Schelhammer & Schattera get into dialogue with those companies, that violated against labour rights according to our research partner oekom research. Second, we cooperate through CRIC with asset managers in Austria, Germany and Switzerland to jointly engage in companies, that had violations against our exclusion criteria in the past. The third pillar is our membership in UNPRI - since we are not a big player in the international financial market, we like to make use of our membership to jointly engage in big enterprises and set investor standards that go inline with the ethical standards of our own bank.

In the case of a positive engagement dialog - the company has set appropriate activities to prevent similar violations in the future - our Ethical Advisory Board has the power to decide if the company can be reconsidered in our investment universe.
