RI TRANSPARENCY REPORT

2020

Crescit Asset Management AB

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

OO 11.4 Provide a brief description of how your organisation includes responsible investment considerations in your investment manager selection, appointment and monitoring processes.

In order to take an evaluation meeting, the manager needs to have an ESG policy in place. The policy needs to be up to date, and implemented. We prefer a less ambitious policy that is actually implemented and a staff awareness to improve rather than a too ambitious policy that is impossible to live by and that gets in the way for the manager to do business. We always have the possibility to manage the assets ourselves.

As a part of the ongoing update process, we meet with the manager at least quarterly and part of the evaluation is an update on how their ESG work proceeds and what type of challenges they have faced and what's the next item on their ESG agenda.

OO 11.5 For your externally managed pooled funds, describe any mechanisms in place to set expectations as part of the appointment or commitment process.

We make it clear that ESG investing is the future for our fund company and as an external manager you represent Crescit. We expect the manager to be up to date on their current policy and also plan ahead. We express our expectation orally on our evaluation meetings on updates.
