# RI TRANSPARENCY REPORT

## 2020

EARNEST Partners

## About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

## Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Because a company's sustainability performance can impact its ability to create long-term value for investors, responsible and impactful investing is integrated into our investment approach alongside financial and other relevant investment considerations.

Our Investment Team employs a rigorous fundamental analysis of each company considered for investment, which includes identifying and considering various ESG-focused factors. We believe that sustainable, long-term investing extends beyond the evaluation of quantitative factors and traditional fundamental review of conventional financial metrics, which results in impactful investing being a natural derivative of our quality-oriented fundamental research and risk management.

<b>FI 01.2</b>	Describe your reasons for choosing a particular ESG incorporation strategy and how combinations of strategies are used.
----------------	---

EARNEST Partners utilizes an investment philosophy and process grounded in the concept of sustainability. As part of its fundamental review process, the firm assesses the environmental, social and corporate governance risks and opportunities of every company we look to potentially add to the portfolio. Economic empowerment defines and ties together all of the unique U.S. Agency and municipal investing targeted by the strategy, while we believe that the best corporate investments engage in sustainable endeavors as well. Generating more economic activity with fewer resources or providing economically critical services that allow us to function as a society have proven to be sustainable investments. The EARNEST Partners fixed income investment team proactively seeks these types of programs and borrowers. As opportunities that fit within the philosophy and process of the strategy are identified, the investment team vets each idea with the goal of constructing a balanced, diversified strategy of sustainable investments.
