RI TRANSPARENCY REPORT

2020

Community Capital Management, INC.

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

SG 01.4

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

At CCM, we believe a fully integrated portfolio-one that includes environmental, social and governance (ESG) factors-can deliver strong financial performance while simultaneously having positive long-term economic and sustainable outcomes. Our strategies utilize an innovative bottom-up approach to fixed income and equity investing combining the positive impacts of impact and ESG investing with rigorous financial analysis, an inherent focus on risk management, and transparent research. We provide impact investing solutions coupled with hands-on client service and report to clients on the multiple positive impact outcomes of their investments.

We execute on this philosophy as follows:

- CCM manages assets that align with one or more of 18 impact themes. These themes include: affordable health/rehab care, affordable housing, arts & culture, disaster recovery, economic inclusion, education/childcare, enterprise development/jobs, environmental sustainability, gender lens, government supported communities, healthy communities, human empowerment, minority neighborhoods, neighborhood revitalization, rural community development, seniors/disabled, sustainable agriculture, and transit-oriented development. Clients are encouraged to tell us their impact preferences.
- We look for affirmative, bottom-up expressions of impact and ESG qualifications.
- Our two-fold approach seeks positive impact and ESG attributes that align with our impact themes while also avoiding investments which we believe are inconsistent with these themes.

SG 01.5

Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

FIXED INCOME

CCM's fixed income strategies invest in high quality, well-researched bonds where we have confidence that the use of the proceeds will have positive societal impacts. Each of the bonds that we select for a portfolio must meet our stringent impact and financial criteria. Our impact criteria includes:

Use of Proceeds: The use of proceeds must positively impact a community in one or more ways and align with one or more of our 18 impact themes..

Transparency: Our proprietary approach, whereby we have visibility into the use of bond proceeds, allows us to better understand the financed programs and have confidence in their expected positive environmental and social outcomes.

Reporting: We must be able to quantify and report on the expected impact and/or detail the qualitative benefits of each investment. Quantitative data can include the number of jobs created or the number of affordable housing units created as well as dollar amounts invested in impact themes. Qualitative research is the "story," so to speak, which includes detailed explanations of what the security is financing. We report to clients on the positive impact outcomes of their investments and offer institutional clients the opportunity to customize their fixed income portfolios by geographies or impact themes.

EQUITIES

Similar to our approach in fixed income, we evaluate equity securities from an impact and financial perspective. CCM supplements its in-house research with third-party data to determine where potential holdings fall in the following four categories:

Strong Positive Impact: companies that we believe are significant contributors to society such as those that generate more than 50 percent of their revenue from a product or service that aligns with one or more of our 18 impact themes.

Moderate Positive Impact: companies which have characteristics that align with one or more of our 18 impact themes and that we believe are a net benefit to society.

Neutral Impact: companies that do not fall within the two categories above but where there exists the potential to be included in the two categories in the future.

Negative Impact: companies with excessive ESG-related risk such as fossil fuel exploration and production or any activity related to coal, tobacco, weapons, and prison management, among others. These securities are not eligible for investment.

For investment strategies that include both fixed income and equity investments in a single portfolio, we apply the same respective tools and techniques mentioned above to each investment when measuring, monitoring, and tracking impact and ESG metrics and outcomes.

CCM is one of the world's oldest and largest independent impact asset managers. We take our advocacy and thought leadership responsibilities very seriously and see them as an integral part of our service to our clients and the community. While our investments are only in the United States, we hope that we can be a model for impact managers and asset owners everywhere. Our particular focus is on investment transparency and targeted responsiveness to client impact mandates. We participate regularly in private and public discussions on the continued evolution of the impact/ESG field. Our written outputs - in the form of white papers and our Annual Impact Report - bring our commitment and experience to an ever larger audience.

LEI 01.2	Describe your organisation's approach to ESG incorporation and the reasons for choosing the particular strategy/strategies.
----------	---

Similar to our approach in fixed income, we evaluate equity securities from an impact and financial perspective. CCM supplements its in-house research with third-party data to determine where potential holdings fall in the following four categories:

Strong Positive Impact: companies that we believe are significant contributors to society such as those that generate more than 50 percent of their revenue from a product or service and that align with one or more of our 18 impact themes.

Moderate Positive Impact: companies which have characteristics that align with one or more of our 18 impact themes and that we believe are a net benefit to society.

Neutral Impact: companies that do not fall within the two categories above but where there exists the potential to be included in the two categories in the future.

Negative Impact: companies with excessive ESG-related risk such as fossil fuel exploration and production or any activity related to coal, tobacco, chemical manufacturing, weapons, and prison management, among others. These securities are not eligible for investment.

We believe this approach allows for us to not only negative screen, but also incorporate positive impact into our selection process by evaluating securities based on positive behavior and outcomes. These impact and ESG

factors not only define our opportunity set, but they provide us with a more robust way to evaluate the financial risks and opportunities present in each security we consider for the portfolio.

LEI 01.3

If assets are managed using a combination of ESG incorporation strategies, briefly describe how these combinations are used. [Optional]

Our approach incorporates all three strategies. We screen by categorizing certain securities with excessive ESG-related risk as not eligible for investment. We use the integration strategy by categorizing securities into the positive impact part of the portfolio - i.e. choosing securities that we believe have characteristics or significant contributions to positive impact to society. We also use the thematic strategy within the positive impact part of the portfolio by aligning those securities with one or more of our 18 impact themes based on the securities positive impact on society.

Additional information [optional]

As an active investor with a strong concern for corporate responsibility, we support communication with company management about organizational practices we would like improved. We engage in active, ongoing dialogue with Fund shareholders to ensure that the views we express to corporations reflect our opinion and theirs as well.

We continue to withhold votes from all Board nominees for corporate boards that have fewer than two female directors. All male boards and boards with only one woman conflict with our views on adequate women/minority representation on corporate boards. Based on our beliefs and client feedback, our current proxy voting plans are included below.

We support:

- Corporate boards that include adequate representation for independent, women, and minority directors; we will withhold votes from all corporate board nominees that result in fewer than two women directors.
- Corporate disclosure, reporting, and transparency resolutions, especially in regard to disclosure of climate risk and gender pay gap.
- "Say on pay" and similar efforts to give a company's owners a voice in management compensation.
- Company benefits and/or compensation plans for all regardless of gender, race, age, or sexual orientation.
- Policies that promote the voting power of the share classes offered to the public.
- Companies that recognize the carbon intensity of their businesses.
- Safe working conditions for all of a company's workers, and contractors regardless of global location.

FI 01.2 Describe your reasons for choosing a particular ESG incorporation strategy and how combinations of strategies are used.

Our firm was started for community investing for banks and has grown since that time to include all types of institutional and individual investors looking for fixed income positive impact and ESG solutions. We invest in high quality, well-researched bonds that have positive societal impacts and use a combination of all three ESG incorporation strategies to make our investment decisions.

We require transparency into the specific use of the proceeds of each bond, which allows us to align and measure its anticipated corresponding impact with one or more of our impact themes (i.e. environmental sustainability, gender lens, minority advancement, etc.). We are then able to customize and report to our clients by geographies as well as by impact themes.

FI 01.3	Additional information [Optional].
----------------	------------------------------------

Each of the bonds that we select for the portfolio must meet our stringent impact and financial criteria. Our impact criteria include:

- **Use of Proceeds:** The use of proceeds must positively impact a community in one or more ways.
- **Transparency:** Our proprietary approach, whereby we have visibility into the use of bond proceeds, allows us to better understand the financed programs and have confidence in their expected positive environmental and social outcomes.
- **Reporting:** We must be able to quantify and report on the expected impact and/or detail the qualitative benefits of the investment. Quantitative data can include the number of jobs created or the number of affordable housing units as well as dollar amounts invested in impact themes. Qualitative research is the "story," so to speak, which includes detailed explanations of what the security is financing. We report to clients on the positive impact outcomes of their investments and offer institutional clients the opportunity to customize their fixed income portfolios by geographies or impact themes.

FI 03.1	Indicate how you ensure that your ESG research process is robust:
----------------	---

- Comprehensive ESG research is undertaken internally to determine companies' activities; and products and/or services
- Issuers are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies
- Issuer information and/or ESG ratings are updated regularly to ensure ESG research is accurate
- Internal audits and regular reviews of ESG research are undertaken in a systematic way.
- A materiality/sustainability framework is created and regularly updated that includes all the key ESG risks and opportunities for each sector/country.

- None of the above

FI 03.2	Describe how your ESG information or analysis is shared among your investment team.
----------------	---

- ESG information is held within a centralised database and is accessible to all investment staff
- ESG information is displayed on front office research platforms
- ESG information is a standard item on all individual issuer summaries, research notes, 'tear sheets', or similar documents
- Investment staff are required to discuss ESG information on issuers as a standard item during investment committee meetings
- Records capture how ESG information and research was incorporated into investment decisions

FI 04.2 Describe your approach to screening for internally managed active fixed income

CCM's fixed income strategies invest in high quality, well-researched bonds where we have confidence that the use of the proceeds will have positive societal impacts. Each of the bonds that we select for a portfolio must meet our stringent impact and financial criteria. Our impact criteria and 18 impact themes include:

Use of the Proceeds: The use of proceeds must positively impact a community in one or more ways. The areas of focus are what we call our 18 impact themes

Transparency: Our proprietary approach, whereby we have visibility into the use of bond proceeds, allows us to better understand the financed programs and have confidence in their expected positive environmental and social outcomes. Without that transparency, we might never know whether the funds raised will provide the positive impact our clients are seeking.

Reporting: We must be able to quantify and report on the expected impact and/or detail the qualitative benefits of the investment. Quantitative data can include the number of jobs created or the number of affordable housing units as well as dollar amounts invested in impact themes. Qualitative research is the "story," so to speak, which includes detailed explanations of what the security is financing.

FI 10	Mandatory	Public	Descriptive	PRI 1
--------------	------------------	---------------	--------------------	--------------

FI 10.1	Describe your approach to integrating ESG into traditional financial analysis.
----------------	--

We seek to invest in high quality, well-researched bonds that have positive societal impacts, requiring transparency into the specific use of the proceeds, and measurement of their anticipated corresponding impact; actively manage the portfolio to take advantage of opportunities and reduce unnecessary risks; build a portfolio that keeps risks lower, income higher, and diversification benefits better than the broad investment grade bond market. Each of the bonds must meet our stringent impact and financial criteria. We need to be able to measure, monitor, and track the positive impact outcomes of every bond.

FI 10.2	Describe how your ESG integration approach is adapted to each of the different types of fixed income you invest in.
----------------	---

	Corporate (financial)
--	-----------------------

We do not have a large allocation to corporate bonds since we will only invest in those corporate bonds where we see an identifiable and impactful use of proceeds. If there is a clear use of proceeds that can be aligned to one or more of our 18 impact themes, the team focuses on the ability for the borrower to meet its debt obligations. This is done by analyzing the offering statements and corresponding financial information, and then discussions with the banker/issuer to get further insight or clarifications. Emphasis is placed on redemption features and/or covenants, any credit enhancements, and the sources that will be used for the payment of interest and repayment of principal. The process also serves as a verification of the purpose of the project to ensure that the impact criteria are indeed met. We need to have transparency into the use of the bond's proceeds to ensure the funds raised will provide provide environmental and social outcomes that can be measured, monitored, and tracked.

The team will also ensure there is no excessive ESG-related risk in regards to the issuer. We will not invest in corporate bonds issued by companies involved in fossil fuel exploration and production or any activity related to coal, tobacco, chemical manufacturing, weapons, and prison management, among others.

Corporate (non-financial)

Securitized

The team focuses on the voluntary and non-voluntary principal prepayments and any potential delinquencies. For agency MBS, our focus on low-to-moderate income borrowers has historically provided more consistent prepayment protection than what external pricing models would suggest, alleviating some of the issues around accelerated cashflows when rates fall and generating better total returns. We need to have transparency into the use of the bond's proceeds to ensure the funds raised will provide provide environmental and social outcomes that can be measured, monitored, and tracked. Each bond goes through our rigorous research process which includes impact and financial analysis and is taged by geography and with one or more of our eighteen impact themes.

Corporate (financial)

Impact/ESG is integral to all aspects of investment activity at CCM. Our goal is for each portfolio to have maximum alignment with CCM's Impact Themes. We perform a use-of-proceeds analysis of each debt security under consideration. Our tools for alignment achievement vary by asset class. For corporate securities issued by financial institutions, we focus on the issuer's overall ESG risk intensity using proprietary and third-party research data. For U.S. banks, we also look at the firm's Community Reinvestment Act (CRA) test score from government regulators.

Corporate (non-financial)

Impact/ESG is integral to all aspects of investment activity at CCM. Our goal is for each portfolio to have maximum alignment with CCM's Impact Themes. We perform a use-of-proceeds analysis of each debt security under consideration. Our tools for alignment achievement vary by asset class. For corporate securities, we focus on the issuer's overall ESG risk intensity using proprietary and third-party research data. In some instances, we look at a corporate debt offering with attractive impact purpose that is issued by a company that we may not rate highly on overall ESG characteristics. Our policy is to look at these on a case-by-case basis and make decisions after robust internal discussions.

Securitized

Impact/ESG is integral to all aspects of investment activity at CCM. Our goal is for each portfolio to have maximum alignment with CCM's Impact Themes. We perform a use-of-proceeds analysis of each debt security under consideration. Our tools for alignment achievement vary by asset class. Securitized debt securities allow for the most detailed use-of-proceeds analysis as issuers typically share substantial granular detail about the collateral being securitized. Our proprietary impact database captures information at the whole loan level so that each dollar invested can be matched up against its specific purpose, geography and impact theme.
