RI TRANSPARENCY REPORT

2020

fair-finance Vorsorgekasse AG

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

SG 01.4

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

Investment opportunities are examined to what extent they violate the defined exclusion or negative criteria. If controversial business fields or controversy business practices are concerned, an investment is not permissible. In order to minimize systematic income risks, such as those arising from the exclusion of entire industries, negative criteria are only applied where, on the one hand, the definition of the criteria and, on the other hand, the data base on the investment options is clear. Those investment opportunities are selected on the basis of positive criteria (best-in-class approach) which make a significant contribution to sustainable economic activity and achieve their economic success taking into account social, ethical and ecological aspects. ESG criteria are used to identify exemplary companies, institutions, and countries that are at the forefront of the various dimensions of sustainability and excel in ecological, social, and economic action. Following the restriction of investment opportunities on the basis of the negative and best-in-class criteria, where appropriate finally the identification of opportunities is based on qualitative and quantitative financial and extra-financial factors relevant to performance. In addition, Engagement is an essential part of our strategy, focusing on impact investments.

SG 01.5

Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

Sustainability Universe: exclusion criteria and best in class for securities; criteria for microfinance, alternative energy, forest, real estate (impact investments) and engagement activities

Strategic Asset Allocation: maximum weighting of absolute return asset classes and historical income and stress scenarios must result in minimum return

Tactical asset allocation: based on secondary analyses

Investment decisions: rule-based, from the first half of the peer group
