# RI TRANSPARENCY REPORT

## 2019

Arion Bank

## About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2019 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

## Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Arion Bank has in place organisational and administrative arrangements to manage conflicts of interest which it has identified as entailing a material risk of damage to the interests of one or more of its clients, and has established and implemented a written conflicts of interest policy.

The arrangements that Arion Bank has put in place to manage conflicts of interest are broadly designed to ensure that those personnel and group entities carrying out different business activities involving a conflict of interest carry out such activities with a sufficient level of independence to protect the interests of its clients.

If the arrangements put in place by Arion Bank to manage conflicts of interest are not sufficient to ensure with reasonable confidence, that the risk of damage to the interests of a client will be prevented, Arion Bank will clearly disclose the general nature and/or sources of conflicts of interest to the client before undertaking business with them. Further details of Arion Bank conflicts of interest policy are available on request.

LEI 01.2

Describe your organisation's approach to incorporation and the reasons for choosing the particular ESG incorporation strategy/strategies.

In our approach to ESG integration we divide the investment process into two parts, before the investment decision is made and after the investment has been executed. Before the investment decision is made a critical part is to gather information on material ESG factors as a part of traditional economic and financial information associated with an investment. The material ESG information gathered will vary by investment style, industry, market trends and client objectives. After the investment has been made we emphasize on active ownership and proxy voting approach.
