# RI TRANSPARENCY REPORT

## 2019

BB DTVM

## About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2019 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

## Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

**SG 01.5**

Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

BB DTVM evaluates the combination of financial and corporate governance returns with the principles of ESG (Environmental, Social and Corporate Governance) seeking to align the interests based on the tripple bottom line, that is, Environment, Financial and Social.

As a way to deepen the aspects related to ESG, BB DTVM developed its own methodology for evaluating the sustainability of the companies within its coverage framework.

For variable income assets, a ranking is drawn up with the best placed companies, influencing the various stock allocation strategies. For private credit operations, the ASG aspects make up a qualitative and quantitative rule that influences decision making, which may imply objecting to the credit limit, reducing or increasing the limit.

Evaluations are made available to managers so that they can apply practices that favor the integration of environmental, social and corporate governance issues.

<b>LEI 01.2</b>	Describe your organisation's approach to incorporation and the reasons for choosing the particular ESG incorporation strategy/strategies.
-----------------	---

We select the stocks that will make part of the portfolios from the best options shown by the ESG methodology of the analysis team, considering ESG factors, financial/economic sustainability and potential upside.

Due to the different needs of the credit and stock areas, the methodology for incorporating ESG (Environmental, Social and Corporate Governance) aspects into the analyzes is divided into two main groups: general indicators and specific indicators. The general indicators were segmented into four distinct pillars, encompassing issues related to the governance structure, social and environmental aspects and the company's positioning in relation to sustainability indices, as well as its alignment with the GRI (Global Reporting Initiative) standard involving the analysis of themes such as: natural resources, biodiversity, solid waste treatment, liquid effluents, atmospheric emissions, labor rights, human rights, among others. The specific indicators were defined according to the needs of each area. The evaluations and their results, in ranking form, are made available to managers so that they can apply in their processes, analysis and decision making of investments, practices that favor the integration of environmental, social and corporate governance issues

Additional information. [Optional]

We participate at the Brazilian PRI engagement group and additionally perform both proactive as reactive actions in order to ensure the sustainability of our investments. Proactively, we highlight the analysis of executive compensation. If we identified politics that can be considerade excessive, we seek to participate in assemblies to express our dissatisfaction with the current policy and try to reverse it. Moreover, in our ongoing meetings with representatives of RI, we encourage companies to publish sustainability reports, preferably in GRI's standards and question aspects that we consider are in disagree with good ESG practices. The engagement is done by fundamentalist analysts following companies covered

**FI 01.2** Describe your reasons for choosing a particular ESG incorporation strategy and how combinations of strategies are used.

BB DTVM adopts a modern methodology in its analyzes based on a positive / best-in-class filter. In addition, we engage with debt issuers, conducting awareness-raising and encouraging companies to improve the quality and quantity of publicly available ESG information on their corporate sites. Investors are aware that such information is evaluated and will influence the final outcome of the credit analysis. We use the combination of strategies because we believe that when penalizing the issuer in the offer of credit for lack of compliance with the ESG criteria we contend for an enforcement of the company's financial sustainability.

**FI 03.1** Indicate how you ensure that your ESG research process is robust:

- Comprehensive ESG research is undertaken internally to determine companies' activities; and products and/or services
- Issuers are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies
- Issuer information and/or ESG ratings are updated regularly to ensure ESG research is accurate
- Internal audits and regular reviews of ESG research are undertaken in a systematic way.
- A materiality/sustainability framework is created and regularly updated that includes all the key ESG risks and opportunities for each sector/country.
- Other, specify
- None of the above

**FI 03.2** Describe how your ESG information or analysis is shared among your investment team.

**FI 04.2** Describe your approach to screening for internally managed active fixed income

BB DTVM adopts ESG methodology in its analyzes based on the use of the filter positive/ negative / best-in-class. The methodology for incorporating ESG aspects into credit and stock analyzes is divided into two main groups: general indicators and specific indicators.

The general indicators were segmented into four distinct pillars, encompassing issues related to governance structure, social and environmental aspects and the company's positioning in relation to sustainability indexes, as well as its alignment with the GRI standard involving the analysis of themes such as natural resources, biodiversity, solid waste treatment, liquid effluents, atmospheric emissions, labor rights, human rights, among others.

The methodology consists of a qualitative evaluation through a questionnaire based on the general and specific factors described in the previous items. From the obtained score an ESG rating is established to the companies analyzed. The result of the score, the assigned rating and the main aspects observed in the ESG analysis are recorded in the investment risk analysis summary. Those poorly rated companies are penalized and their credit supply has declined.
