RI TRANSPARENCY REPORT

2020

Sound Shore Management, Inc.

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

Sound Shore's experience has been that high standards of corporate responsibility including good business practices, transparency and accountability, reflect good business sense and are directly related to long term investment outperformance. Our fundamental company research includes active engagement with management. Before owning a stock, we generally meet with management directly. Additionally, we conduct cross-checks with suppliers, competitors, clients, and other relevant primary sources. We have approximately 600 management meetings annually.

Criteria we evaluate to assess risk include:

- Operating performance
- Rigor in capital expenditure budgeting and allocation
- Compensation practices
- Director accountability
- Climate and environmental risks and changes
- Social factors and changes
- Focus on total shareholder return versus appropriate market benchmarks
- Free cash flow per share and shareholder yield (dividends plus share repurchase)
- Time allocated to non-core activities
- Other company specific responsible investing factors

As long-term investors of our clients' capital, we view active ownership as our fiduciary responsibility. Our company-specific due diligence process includes financial statement analysis, focusing on risks and liabilities, including ESG considerations. Sound Shore discusses material items with management, providing remediation input. Our target valuations for stocks will include estimate for these factors if relevant. We also utilize external sources such as Bloomberg ESG data.

-----------------	---

Responsible investing is an integral component of the investment philosophy shared by Sound Shore Management and the clients for which we invest. We are long-term investors and encourage company management teams that we partner with to manage for the long-term as well. We believe companies that effectively oversee environmental, social and governance matters may exhibit less risk and their stocks may have the potential to outperform the market over the long term.

LEI 01.3	If assets are managed using a combination of ESG incorporation strategies, briefly describe how these combinations are used. [Optional]

Description

Assessing and managing investment risk is an essential part of our disciplined fundamental value process. As a part of the prudent management of our clients' assets, we aim to actively understand all relevant risks and opportunities including ESG specific factors.

This includes integrating ESG factors into our investment analysis, decisions and processes. As an owner of equities, we monitor ESG factors and are committed to engaging company managements and their boards, where appropriate, as a way of raising awareness and promoting sustainable shareholder value.

Attractive long-term returns correlate with responsibly managed companies. Sound Shore utilizes its influence as an institutional shareholder to encourage companies to think long-term, which includes managing and reporting on their ESG risks. It is our belief that transparency and disclosure can result in positive change that benefits both shareholders and all stakeholders.

Screening criteria are established on a company-specific basis. Our research process attempts to isolate issues that can effect valuation, including the effectiveness of senior executive leadership, revenue and earnings growth drivers, deployment of capital, compensation alignment, transparency, governance (such as related party conflicts), and corporate strategy.

- Positive/best-in-class screening
 Norms-based screening

LEI 04.2 Describe how you notify clients and/or beneficiaries when changes are made to your screening criteria.

Sound Shore's investment process has remained unchanged since our 1978 founding. Any changes to screening criteria would be made as part of our regular client communication.
